**The Making of a New Rural Order in South China: Volume 1, Village, Land, and Lineage in Huizhou, 900-1600**

Joseph P. McDermott, 2013-11-28 Among the large caches of private documents discovered and collected in China, few rival the Huizhou sources for the insight they provide into Chinese local society and economy over the past millennium. Having spent decades researching these exceptionally rich sources, Joseph P. McDermott presents in two volumes his findings about the major social and economic changes in this important prefecture of south China from around 900 to 1700. In this first volume, we learn about village settlement, competition among village religious institutions, premodern agricultural production, the management of land and lineage, the rise of the lineage as the dominant institution, and its members' application of commercial practices to local forestry operations. This landmark study of religious life and economic activity, of lineage and land, and of rural residents and urban commercial practices provides a compelling new framework for understanding a distinctive path of economic and social development for premodern China and beyond.

*Police Courts in Nineteenth-Century Scotland, Volume 1* David G. Barrie, Susan Broomhall, 2016-04-22 Taking the form of two companion volumes, *Police Courts in Nineteenth-Century Scotland* represents the first major investigation into the administration, experience, impact and representation of summary justice in Scottish towns, c.1800 to 1892. Each volume explores diverse, but complementary, themes relating to judicial practices, relationships, experiences and discourses through the lens of the same subject matter: the police court. Volume 1, with the subtitle *Magistrates, Media and the Masses*, provides an institutional, social and cultural history of the establishment, development and practice of police courts. It explores their rise, purpose and internal workings, and how justice was administered and experienced by those who attended them in a variety of roles. Special attention is given to examining how courtroom discourse was represented in print culture, the role of the media in providing a discursive commentary on summary justice, and the ways in which magistrates and the police engaged in a law and order dialogue with the press. Throughout, consideration is given to uncovering the relationship between magistrates, the courts, the police and the wider community, and to charting the implications of the rise of summary justice and the 'police-man' state for the urban masses (as evidenced through prosecution, conviction and punishment patterns). Volume 2, with the subtitle *Boundaries, Behaviours and Bodies*, explores, through themed case studies, how police courts shaped conceptual, spatial, temporal and commercial boundaries by regulating every-day activities, pastimes and cultures.

*Police Courts in Nineteenth-Century Scotland, Volume 1* Dr David G Barrie, Professor Susan Broomhall, 2014-12-28 Taking

**Populism: A Very Short Introduction** Cas Mudde, Cristobal Rovira Kaltwasser, 2017-01-02 Populism is a central concept in the current media debates about politics and elections. However, like most political buzzwords, the term often floats from one meaning to another, and both social scientists and journalists use it to denote diverse phenomena. What is populism really? Who are the populist leaders? And what is the relationship between populism and democracy? This book answers these questions in a simple and persuasive way, offering a swift guide to populism in theory and practice. Cas Mudde and Cristóbal Rovira Kaltwasser present populism as an ideology that divides society into two antagonistic camps, the pure people versus the corrupt elite, and that privileges the general will of the people above all else. They illustrate the practical power of this ideology through a survey of representative populist movements of the modern era: European right-wing parties, left-wing presidents in Latin America, and the Tea Party movement in the United States. The authors delve into the ambivalent personalities of charismatic populist leaders such as Juan Domingo Péron, H. Ross Perot, Jean-Marie le Pen, Silvio Berlusconi, and Hugo Chávez. If the strong male leader embodies the mainstream form of populism, many resolute women, such as Eva Péron, Pauline Hanson, and Sarah Palin, have also succeeded in building a populist status, often by exploiting gendered notions of society. Although populism is ultimately part of democracy, populist movements constitute an increasing challenge to democratic politics. Comparing political trends across different countries, this compelling book debates what the long-term consequences of this challenge could be, as it turns the spotlight on the bewildering effect of populism on today's political and social life.

*Presidential Leadership in the Americas since Independence* Guy Burton,Ted Goertzel,2016-10-05 What is presidential leadership and why have some presidents been considered “great” - or rather “transformational” - while others are not? What are the drivers which distinguish these presidents from the rest? *Presidential Leadership in the Americas since Independence* answers these questions through a systematic study of leadership across the Americas over 200 years, from independence to the present day. Having surveyed who the most cited presidents are in the Americas, Guy Burton and Ted Goertzel examine the experience of presidents from across the western hemisphere: the US, Argentina, Brazil, Chile, Colombia, Mexico, Peru and Venezuela. They study the relationship between these men and women’s actions within the constraints they faced during four political periods: independence, national consolidation during the nineteenth century, state-building from the late nineteenth to mid twentieth centuries and neoliberalism since the 1970s-80s. The most “transformational” presidents are found to be those who are not only able to innovate and build new political consensus at a time of crisis, but also consolidate them so that the reforms becoming lasting - and extending beyond an individual president’s own political (even biological) lifetime.

***The Oxford Handbook of American Economic History*** Edited by Louis P. Cain,Edited by Price V. Fishback,Edited by Paul W. Rhode,2018-06-15 American economic history describes the transition of a handful of struggling settlements on the Atlantic seaboard into the nation with the most successful economy in the world today. As the economy has developed, so have the methods used by economic historians to analyze the process. Interest in economic history has sharply increased in recent years among the public, policy-makers, and in the academy. The current economic turmoil, calling forth comparisons with the Great Depression of the 1930s, is in part responsible for the surge in interest among the public and in policy circles. It has also stimulated greater scholarly research into past financial crises, the multiplier effects of fiscal and monetary policy, the dynamics of the housing market, and international economic cooperation and conflict. Other pressing policy issues--

including the impending retirement of the Baby-Boom generation, the ongoing expansion of the healthcare sector, and the environmental challenges imposed by global climate change--have further increased demand for the long-run perspective given by economic history. Confronting this need, The Oxford Handbook of American Economic History affords access to the latest research on the crucial events, themes, and legacies of America's economic history--from colonial America, to the Civil War, up to present day. More than fifty contributors address topics as wide-ranging as immigration, agriculture, and urbanization. Over its two volumes, this handbook gives readers not only a comprehensive look at where the field of American economic history currently stands but where it is headed in the years to come.

*Dynamics of an Authoritarian System* Mária Csanádi, Márton Gerő, Miklós Hajdu, Imre Kovách, István János Tóth, Mihály Laki, 2022-07-12 This conceptually synthetic and empirically rich book demonstrates the vulnerability of democratic settings to authoritarianism and populism. Six scholars from various professional fields explore here the metamorphosis of a political party into a centralized authoritarian system. Viktor Orbán and his Fidesz party needed less than ten years to accomplish this transformation in Hungary. In 2010, after winning a majority that could make changes in the constitution - two-thirds of the parliamentary seats, they evolved and stabilized the system, which produced again the two-thirds majority in 2014 and 2018. The authors reveal how a democratic setting can be used as a device for political capture. They show how a political entity managed to penetrate almost all sub-fields of the economy to arrive at institutionalized corruption, and how the centralized power structure reproduces itself. With the help of a powerful empirical apparatus—among others analyses of more than 220,000 public tenders, redistributions of state subsidies, and the interconnectedness of those privileged with the political elite — the authors detail the functioning of a crony system and the network aspects of political connections in the rapid enrichment of politically-linked businesses. Their studies demonstrate the role of political capture in this redistribution and how this capture leads to a new social stratification.

**A History of Law in Canada, Vol. 1** Philip Girard, Jim Phillips, R. Blake Brown, 2018-01-01 A History of Law in Canada is the first of two volumes. Volume one begins at a time just prior to European contact and continues to the 1860s, while volume two will start with Confederation and end at approximately 2000. The history of law includes substantive law, legal institutions, legal actors, and legal culture. The authors assume that since 1500 there have been three legal systems in Canada - the Indigenous, the French, and the English. At all times, these systems have co-existed and interacted, with the relative power and influence of each being more or less dominant in different periods. The history of law cannot be treated in isolation, and this book examines law as a dynamic process, shaped by and affecting other histories over the long term. The law guided and was guided by economic developments, was influenced and moulded by the nature and trajectory of political ideas and institutions, and variously exacerbated or mediated intercultural exchange and conflict. These themes are apparent in this examination, and through most areas of law including land settlement and tenure, and family, commercial, constitutional, and criminal law.
