Fun-Size Academic Writing for Serious Learning Gretchen Bernabei, Judi Reimer, 2013-08-06 Here is what I love about this book:€ It has gobs and gobs of student writing samples with smart and lively explanations of how to use each as the focus of a craft lesson to teach writing. The right models of student writing are the best mentor texts a teacher can find and with this book, you need look no further. ... Breathe, fellow writing teachers.€ Much needed and wanted help has arrived.-- Ruth Culham, Author of *Traits Writing* Sometimes a student's best teacher is another student If ever there were a book to respond to the pressure to increase students' test scores, this is it. You see,

Academic Writing for Graduate Students John M. Swales, Christine B. Feak, 1994 A Course for Nonnative Speakers of English. Genre-based approach. Includes units such as graphs and commenting on other data and research papers.

The Six Academic Writing Assignments Jim Burke, 2018-10-23 Writing assignments are road maps-or they should be. They guide the writer on a journey. They lay out a process, envision a destination. They are designed. As Jim Burke explains it: What we are really doing when we create a year's worth of writing assignments, of experiences, is designing a story. Each day's class a sentence, each week a paragraph, each unit a chapter in the story of the year students spend in our classes. And as with any good story, there needs to be tension and transformation by the time one arrives at the end, or what I have called 'the user's journey.' These maps are crucially important for engaging students with academic writing, which is often unfamiliar territory. Drawing on his extensive review of academic writing assignments across the country, Jim identifies six major categories of writing assignments that help students become better writers, readers, and thinkers: - Writing to learn - Short answer - Writing on demand - Process paper (which goes through multiple drafts) - Research paper/report - Alternate forms (multimedia presentations, etc.). For each assignment type, Jim invites us into his own practice. He shows how he composes the assignment, how he creates gateway activities to help prepare students, how he troubleshoots common problems, how he gives response, how he clarifies the criteria on which students will be judged. He also shows how these assignments are related-how the earlier assignments build to later more complex ones So please join a master teacher at

work. Take this journey with him.

Teaching Academic Writing in European Higher Education Lennart Björk, Gerd Bräuer, L. Rienecker, Peter Stray Jørgensen, 2005-12-30 This volume describes in detail teaching philosophies, curricular structures, research approaches and organizational models used in European countries. It offers concrete teaching strategies and examples: from individual tutorials to large classes, from face-to-face to web-based teaching, and addresses educational and cultural differences between writing instruction in Europe and the US.

Teaching Theory and Academic Writing Malte Brosig, Kinga Kas, 2008-04-16 The volume is written for young researchers who are teaching at undergraduate level and are interested in further developing their teaching skills and publishing record. The authors of the book have compiled a volume that is rich in experience and presents innovative methods to modern teaching in political science. The book follows a practice-oriented approach in teaching and assists the reader with inspiration and concrete examples when designing courses that are often theory loaded.

Writing Programs Worldwide Chris Thaiss, Gerd Bräuer, 2012-07-30 WRITING PROGRAMS WORLDWIDE offers an important global perspective to the growing research literature in the shaping of writing programs. The authors of its program profiles show how innovators at a diverse range of universities on six continents have dealt creatively over many years with day-to-day and long-range issues affecting how students across disciplines and languages grow as communicators and learners.

Teaching Academic Writing Caroline Coffin, Mary Jane Curry, Sharon Goodman, Ann Hewings, Theresa Lillis, Joan Swann, 2005-07-26 Drawing on writing research, the book takes into account recent developments such as the increasing diversity of the student body, the use of the Internet, electronic tuition and issues surrounding globalisation.

Stylish Academic Writing Helen Sword, 2012-04-02 Elegant data and ideas deserve elegant expression, argues Helen Sword in this lively guide to academic writing. For scholars frustrated with disciplinary conventions, and for specialists who want to write for a larger audience but are unsure where to begin, here are imaginative, practical, witty pointers that show how to make articles and books a pleasure to read—and to write. Dispelling the myth that you cannot get published without writing wordy, impersonal prose, Sword shows how much journal editors and readers welcome work that avoids excessive jargon and abstraction. Sword's analysis of more than a thousand peer-reviewed articles across a wide range of fields documents a startling gap between how academics typically describe good writing and the turgid prose they regularly produce. *Stylish Academic Writing* showcases a range of scholars from the sciences, humanities, and social sciences who write with vividness and panache. Individual chapters take up specific elements of style, such as titles and headings, chapter openings, and structure, and close with examples of transferable techniques that any writer can master.

Writing Spaces 1 Charles Lowe, Pavel Zemliansky, 2010-06-18 Volumes in Writing Spaces: Readings on Writing offer multiple perspectives on a wide-range of topics about writing, much like the model made famous by Wendy Bishop's "The Subject Is . . ." series. In each chapter, authors present their unique views, insights, and strategies for writing by addressing the undergraduate reader directly. Drawing on their own experiences, these teachers-as-writers invite students to join in the larger conversation about developing nearly every aspect of craft of writing. Consequently, each essay functions as a standalone text that can easily complement other selected readings in writing or writing-intensive courses across the disciplines at any level. Topics in Volume 1 of the series include academic writing, how to interpret writing assignments, motives for writing, rhetorical analysis, revision, invention, writing centers, argumentation, narrative, reflective writing, Wikipedia, patchwriting, collaboration, and genres.

Academic Writing Andrew P. Johnson, 2016-05-08 This book provides a foundation and framework to enhance your understanding of the various processes involved in academic writing. The term, academic writing, here refers to the types of writing used in college level writing courses at both the undergraduate and graduate level. However, this book was not written simply to help you pass another English class or to get you through the next writing intensive course (although it will certainly do that). At some point you will be out in the real world (hopefully). Thus, the purpose of this book is to enable you to be an effective writer and thinker in all contexts including your personal and professional lives.

English for Academic Study: Grammar for Writing Anne Vicary, 2014-03-27 English for Academic Study: Grammar for Writing English for Academic Study: Grammar for Writing is a graded self-study course that will help students improve their academic writing. It will build their confidence in understanding and using grammar for written assignments, so they can write accurate English and communicate more effectively in academic contexts. EAS: Grammar for Writing starts at a relatively low level, recognizing that many students require continuing practice of common grammatical problems in academic writing (such as subject-verb agreement, or the use of present simple and present continuous). It gradually increases the level of challenge so that by the end of the book students can use appropriate grammatical structures to express more complex academic ideas. The nine units are based on the following topics: Starting out Information flow within a text Looking back (past simple and present perfect) Showing logical links (1) Showing logical links (2) Expressing shades of meaning Expressing condition Avoiding person-based writing Using relative clauses Each unit is divided into three stages, moving from basic structures to more complex ones. Full explanations and examples are followed by extensive practice exercises. Many exercises use examples from student essays, so students can identify typical problems and work out how to put them right. Each unit also includes an end-of-unit self-check test to give students a quick overview of what they have covered. There are four useful appendices on: articles, describing data, referring to academic sources, and a sample student essay. A full answer key is available here. The dedicated EAS website also provides additional resources across the range of

titles in the series. This book can be used in conjunction with the following books in the English for Academic Studies (EAS) series, also published by Garnet Education: EAS: Reading, EAS: Writing, EAS: Extended Writing & Research Skills, EAS: Listening, EAS: Speaking, EAS: Vocabulary and EAS: Pronunciation

Academic Writing and Publishing James Hartley, 2008-04-22 This readable and lively guide is an invaluable handbook for postgraduates and lecturers new to publishing, with direct advice based on up to date research that goes beyond that given in current textbooks.

Academic Writing, Real World Topics Michael Rectenwald, Lisa Carl, 2015-05-28 *Academic Writing, Real World Topics* fills a void in the writing-across-the-curriculum textbook market. It draws together articles and essays of actual academic prose as opposed to journalism; it arranges material topically as opposed to by discipline or academic division; and it approaches topics from multiple disciplinary and critical perspectives. With extensive introductions, rhetorical instruction, and suggested additional resources accompanying each chapter, *Academic Writing, Real World Topics* introduces students to the kinds of research and writing that they will be expected to undertake throughout their college careers and beyond. Readings are drawn from various disciplines across the major divisions of the university and focus on issues of real import to students today, including such topics as living in a digital culture, learning from games, learning in a digital age, living in a global culture, our post-human future, surviving economic crisis, and assessing armed global conflict. The book provides students with an introduction to the diversity, complexity and connectedness of writing in higher education today. Part I, a short Guide to Academic Writing, teaches rhetorical strategies and approaches to academic writing within and across the major divisions of the academy. For each writing strategy or essay element treated in the Guide, the authors provide examples from the reader, or from one of many resources included in each chapter's Suggested Additional Resources. Part II, *Real World Topics*, also refers extensively to the Guide. Thus, the Guide shows student writers how to employ scholarly writing practices as demonstrated by the readings, while the readings invite students to engage with scholarly content.

Successful Academic Writing Anneliese A. Singh, Lauren Lukkarila, 2017-05-23 Subject Areas/Keywords: academic writing, behavioral sciences, dissertations, empirical articles, graduate students, graduate writing, journal articles, peer-reviewed articles, publications, research articles, research methods, research reporting, research reports, scholarly writing, social sciences, thesis DESCRIPTION Using rich examples and engaging pedagogical tools, this book equips students to master the challenges of academic writing in graduate school and beyond. The authors delve into nitty-gritty aspects of structure, style, and language, and offer a window onto the thought processes and strategies that strong writers rely on. Essential topics include how to: identify the audience for a particular piece of writing; craft a voice appropriate for a discipline-specific community of practice; compose the sections of a qualitative, quantitative, or mixed methods research article; select the right peer-reviewed journal for submitting an article; and navigate the publication process.
