The Boundaries of Europe Pietro Rossi, 2015-04-24 Europe's boundaries have mainly been shaped by cultural, religious, and political conceptions rather than by geography. This volume of bilingual essays from renowned European scholars outlines the transformation of Europe's boundaries from the fall of the ancient world to the age of decolonization, or the end of the explicit endeavor to "Europeanize" the world. From the decline of the Roman Empire to the polycentrism of today's world, the essays span such aspects as the confrontation of Christian Europe with Islam and the changing role of the Mediterranean from "mare nostrum" to a frontier between nations. Scandinavia, eastern Europe and the Atlantic are also analyzed as boundaries in the context of exploration, migratory movements, cultural exchanges, and war. The Boundaries of Europe, edited by Pietro Rossi, is the first installment in the ALLEA book series Discourses on Intellectual Europe, which seeks to explore the question of an intrinsic or quintessential European identity in light of the rising skepticism towards Europe as an integrated cultural and intellectual region.

The Draft Common Frame of Reference Vincent Sagaert, Matthias E. Storme, Evelyne Terryn, 2012 The Draft Common Frame of Reference (DCFR) is the result of more than 25 years of academic research on European private law. The final academic version of the DCFR was published in October 2009, and currently the European Commission is undertaking a selection process in order to determine which parts of the DCFR will be included in a 'political' CFR. Against this background, this book presents and critically analyzes the DCFR and situates it in relation to current Belgian law. (Series: Ius Commune Europaeum - Vol. 99)

The Relentless Revolution: A History of Capitalism Joyce Appleby, 2011-03-07 Splendid: the global history of

capitalism in all its creative—and destructive—glory. —New York Times Book Review With its deep roots and global scope, the capitalist system seems universal and timeless. The framework for our lives, it is a source of constant change, sometimes measured and predictable, sometimes drastic, out of control. Yet what is now ubiquitous was not always so. Capitalism was an unlikely development when it emerged from isolated changes in farming, trade, and manufacturing in early-modern England. Astute observers began to notice these changes and register their effects. Those in power began to harness these new practices to the state, enhancing both. A system generating wealth, power, and new ideas arose to reshape societies in a constant surge of change. Approaching capitalism as a culture, as a historical development that was by no means natural or inevitable, Joyce Appleby gives us a fascinating introduction to this most potent creation of mankind from its origins to its present global reach.

Transparency, Governance and Markets Michele Bagella, L. Becchetti, I. Hasan, 2006-06-30 Covers such topics as: relationship between development of financial markets and economic growth; credit risk; measure of risk in equity and bond markets; and investigating behavior and efficiency of banking intermediaries. This work serves as a useful reference for those interested in financial market dynamics.

The House of Others Silvio D'Arzo, 1995 The illegitimate son of a fortune teller, Ezio Comparoni (1920-52) never knew his father, rarely left his home town, and admitted no one to his home. His deliberate obscurity was compounded by his use of many pseudonyms, including Silvio d'Arzo, under which he wrote the remarkable novella and three stories collected in *The House of Others*. The novella *The House of Others* is among the rare perfect works of twentieth century fiction. In a desolate mountain village an old woman visits the parish priest, ostensibly to ask about dissolving a marriage. Gradually, as she probes for information on special cases--cases in which what is obviously wrong can also be irrefutably right--it becomes clear her true question is whether or not she might take her own life. The question is metaphysical, involving not only the woman's life but the priest's; and to it he has no answer.

Crossbones Nuruddin Farah, 2012-07-05 A dozen years after his last visit, Jeebleh returns to his beloved Mogadiscio to see old friends. He is accompanied by his son-in-law, Malik, a journalist intent on covering the region's ongoing turmoil. What greets them at first is not the chaos Jeebleh remembers, however, but an eerie calm enforced by ubiquitous white-robed figures bearing whips. Meanwhile, Malik's brother, Ahl, has arrived in Puntland, the region notorious as a pirates' base. Ahl is searching for his stepson, Taxliil, who has vanished from Minneapolis, apparently recruited by an imam allied to Somalia's rising religious insurgency. The brothers' efforts draw them closer to Taxliil and deeper into the fabric of the country, even as Somalis brace themselves for an Ethiopian invasion. Jeebleh leaves Mogadiscio only a few hours before the borders are

breached and raids descend from land and sea. As the uneasy quiet shatters and the city turns into a battle zone, the brothers experience firsthand the derailments of war. *Crossbones* is a fascinating look at individuals caught in the maw of zealotry, profiteering and political conflict, by one of Africa's most highly acclaimed international writers.

Handbook on the Economics of Happiness L. Bruni, 2007-01-01 This book is a welcome consolidation and extension of the recent expanding debates on happiness and economics. Happiness and economics, as a new field for research, is now of pivotal interest particularly to welfare economists and psychologists.

Public Procurement and Human Rights Olga Martin-Ortega, Claire Methven O'Brien, 2019 This timely work reflects on the role and obligations of the state as a buyer of goods and services, from the dual disciplinary perspectives of public procurement and human rights. Through theoretical and doctrinal analyses, and practice-focused case studies, it interrogates the evolving character of public procurement as an interface for multiple normative regimes and competing policies. Challenging the prevailing paradigm which subordinates human rights to narrowly-defined economic goals, insightful contributions advance a compelling case for greater inter-disciplinarity and policy coherence as crucial to realising international policies such as those embodied in the UN Guiding Principles on Business and Human Rights and 2030 Sustainable Development Goals.

Emerging Patterns of Social Demand and University Reform David D. Dill, Barbara Sporn, 1995 The aim of this book is to provide a review of the changing environment of major universities in Europe and the United States, with particular emphasis on changes in public policies, and to examine the implications of this new environment on the internal organization of universities. The book is purposely cross-national in its scope, and in the perspective of each author as a means of underscoring the increasing international convergence of public policies affecting higher education and of related university reform. While the book and its authors focus on Europe and the United States, the arguments are likely to be influential on major universities throughout the world, because the discussed trends are now universal. The book is distinguished by its authors, who are internationally acknowledged as leaders in the field. Each author was selected because of his or her acknowledged expertise on the relevant topic, and the papers, while specifically written in a form accessible to policy makers, university leaders, and the broader academic audience, are authoritative with regard to recent research in the field.
