Curses Kevin Huizenga,2024-02-20 In the two decades since *Curses* first hit the shelves, *River at Night* cartoonist Kevin Huizenga has taken his rightful place on a short A-list of comics experimentalists. Deep research and loopy cartooning serve up philosophical musings while maintaining a classic comic-strip devotion to “the gag.” Huizenga remains one of the funniest and smartest cartoonists working today, and now, the very book that heralded his arrival as a talent to watch is available once more in deluxe paperback as the early work of a now true genius. The short stories collected herewith confront the textures of mortality in unique and peculiar ways. Central character Glenn Ganges is a seemingly middle-class, suburbanite whose blank-eyed wonderment at the everyday brings together diverse aspects of our world—like golf, theology, late-night diners, parenthood, politics, Sudanese refugees, and hallucinatory vision—into a complete experience as multifaceted as each of our own lives.

Agents of Atlas (2006) Jeff Parker,2015 Collects *Agents of Atlas (2006) #1-6* - plus the Agents' first appearances! Looking for answers? Get your Atlas! The spy. The spaceman. The goddess. The robot. The gorilla. During the late 1950s, the U.S. government allowed FBI Special Agent Jimmy Woo to forge a team of unlikely heroes. Together, they stormed the fortress of a criminal mastermind to rescue President Eisenhower - but the group disbanded soon after. Now, almost 50 years later, an unauthorized S.H.I.E.L.D. mission goes down in flames - and from the ashes arise forces from the Golden Age of Marvel! It started in 1947 when the Sub-Mariner's cousin hit the printed page, and it finishes up here as yesterday's heroes make tomorrow safe from one of history's horrors!

Kingdom Keepers IV Ridley Pearson, 2022-03-08 For the five teens who modeled as Disney Hologram Imaging hosts, life is beginning to settle down when an intriguing video arrives to Philby's computer at school. It's a call for action: the Overtakers, a group of Disney villains, seem to be plotting to attempt a rescue of two of their leaders, both of whom the Disney Imagineers have hidden away somewhere following a violent encounter in Epcot. A staged attack by new Overtakers at Downtown Disney, startles the group. One of their own, Charlene, is acting strange of late. Has she tired of her role as a Kingdom Keeper or is there something more sinister at play? When caught sneaking into Epcot as her DHI, acting strictly against the group's rules, Finn and Philby take action. Has the impossible occurred? Have the Overtakers created their own holograms? Have they found a way to jump from the Virtual Maintenance Network onto the Internet, and if so, what does that mean for the safety of the parks, and the spread and reach of the Overtakers? Are they recruiting an army from outside the parks? A dark cloud in the Kingdom Keeper era is unfolding, and with dissention in their own ranks, it's unclear if there's any chance of escape.

The Cambridge Handbook of Acculturation Psychology David L. Sam, John W. Berry, 2006-08-03 In recent years the topic of acculturation has evolved from a relatively minor research area to one of the most researched subjects in the field of cross-cultural psychology. This edited handbook compiles and systemizes the current state of the art by exploring the broad international scope of acculturation. A collection of the world's leading experts in the field review the various contexts for acculturation, the central theories, the groups and individuals undergoing acculturation (immigrants, refugees, indigenous people, expatriates, students and tourists) and discuss how current knowledge can be applied to make both the process and its outcome more manageable and profitable. Building on the theoretical and methodological framework of cross-cultural psychology, the authors focus specifically on the issues that arise when people from one culture move to another culture and the reciprocal adjustments, tensions and benefits involved.

Aging, Economic Growth, and Old-age Security in Asia Donghyun Park, Sang-Hyop Lee, Andrew Mason, 2012-01-01 Population aging is perhaps the single biggest economic and social obstacle confronting Asia's future. The region-wide demographic transition towards an older population is fundamentally reshaping the demographic landscape, and is giving rise to two key socio-economic challenges. This timely book provides an in-depth analysis of these challenges and presents concrete policy options for tackling them. First, the expert contributors argue, Asia must find ways to sustain rapid economic growth in the face of less favorable demographics, which implies slower growth of the workforce. Second, they contend, Asia must find ways to deliver affordable, adequate and sustainable old-age economic security for its growing elderly population. Underpinned by rigorous analysis, a wide range of concrete policy options for sustaining economic growth while delivering economic security for the elderly are then presented. These include Asia-wide policy options ð relevant to the entire region ð

such as building up strong national pension systems, whilst other policy options are more relevant to sub-groups of countries. This stimulating and informative book will be of great interest to academics, students and researchers with an interest in Asian studies, economics generally, and more specifically, public sector economics.

Epistemologies of the South Boaventura de Sousa Santos, 2015-11-17 This book explores the concept of 'cognitive injustice': the failure to recognise the different ways of knowing by which people across the globe run their lives and provide meaning to their existence. Boaventura de Sousa Santos shows why global social justice is not possible without global cognitive justice. Santos argues that Western domination has profoundly marginalised knowledge and wisdom that had been in existence in the global South. She contends that today it is imperative to recover and valorize the epistemological diversity of the world. *Epistemologies of the South* outlines a new kind of bottom-up cosmopolitanism, in which conviviality, solidarity and life triumph against the logic of market-ridden greed and individualism.

23 Things They Don't Tell You About Capitalism Ha-Joon Chang, 2010-09-02 Ha-Joon Chang dispels the myths and prejudices that have come to dominate our understanding of how the world works. He succeeds in both setting the historical record straight ('the washing machine has changed the world more than the internet'; 'the US does not have the highest living standard in the world'; 'people in poor countries are more entrepreneurial than people in rich countries') and persuading us of the consequences of his analysis ('making rich people richer doesn't make the rest of us richer'; 'companies should not be run in the interest of their owners'; 'financial markets need to become less, not more, efficient'). As Chang shows above all else, all economic choices are political ones, and it is time we started to be honest about them.

Good Economics for Hard Times Abhijit V. Banerjee, Esther Duflo, 2019-11-12 FROM THE WINNERS OF THE 2019 NOBEL PRIZE IN ECONOMICS 'Wonderfully refreshing . . . A must read' Thomas Piketty In this revolutionary book, prize-winning economists Abhijit V. Banerjee and Esther Duflo show how economics, when done right, can help us solve the thorniest social and political problems of our day. From immigration to inequality, slowing growth to accelerating climate change, we have the resources to address the challenges we face but we are so often blinded by ideology. Original, provocative and urgent, Good Economics for Hard Times offers the new thinking that we need. It builds on cutting-edge research in economics - and years of exploring the most effective solutions to alleviate extreme poverty - to make a persuasive case for an intelligent interventionism and a society built on compassion and respect. A much-needed antidote to polarized discourse, this book shines a light to help us appreciate and understand our precariously balanced world.
