Degradation of Implant Materials Noam Eliaz, 2012-08-21 This book reviews the current understanding of the mechanical, chemical and biological processes that are responsible for the degradation of a variety of implant materials. All 18 chapters will be written by internationally renowned experts to address both fundamental and practical aspects of research into the field. Different failure mechanisms such as corrosion, fatigue, and wear will be reviewed, together with experimental techniques for monitoring them, either in vitro or in vivo. Procedures for implant retrieval and analysis will be presented. A variety of biomaterials (stainless steels, titanium and its alloys, nitinol, magnesium alloys, polyethylene, biodegradable polymers, silicone gel, hydrogels, calcium phosphates) and medical devices (orthopedic and dental implants, stents, heart valves, breast implants) will be analyzed in detail. The book will serve as a broad reference source for graduate students and researchers studying biomedicine, corrosion, surface science, and electrochemistry.

Literary Translation, Reception, and Transfer Norbert Bachleitner, 2020-09-21 The three concepts mentioned in the title of this volume imply the contact between two or more literary phenomena; they are based on similarities that are related to a form of 'travelling' and imitation or adaptation of entire texts, genres, forms or contents. Transfer comprises all sorts of 'travelling', with translation as a major instrument of transferring literature across linguistic and cultural barriers. Transfer aims at the process of communication, starting with the source product and its cultural context and then highlighting the mediation by certain agents and institutions to end up with inclusion in the target culture. Reception lays its focus on the receiving culture, especially on criticism, reading, and interpretation. Translation, therefore, forms a major factor in reception with the general aim of reception studies being to reveal the wide spectrum of interpretations each text offers. Moreover, translations are the prime instrument in the distribution of literature across linguistic and cultural borders; thus, they pave the way for gaining prestige in the world of literature. The thirty-eight papers included in this volume and dedicated to research in this area were previously read at the ICLA conference 2016 in Vienna. They are ample proof that the field remains at the center of interest in Comparative Literature.

Approaches to Arabic Dialects Martine Haak, Rudolf de Jong, Kees Versteegh, 2017-07-03 This volume brings together 22 contributions to the study of Arabic dialects, from the Maghreb to Iraq by authors, who are all well-known for their work in this field. It underscores the importance of different theoretical approaches to the study of dialects, developing new frameworks for the study of variation and change in the dialects, while presenting new data on dialects (e.g., of Jaffa, Southern Sinai, Nigeria, South Morocco and Mosul) and cross-dialectal comparisons (e.g., on the feminine gender and on relative clauses). This collection is presented to Manfred Woidich, one of the most eminent scholars in the field of Arabic dialectology.

Catalogue of Palaearctic Coleoptera Ivan Löbl, Aleš Smetana, 2003 This is the sixth volume of a comprehensive series which covers about 100,000 species of Coleoptera known to occur in the Palaearctic Region. The information provided for each species is as follows: primary taxonomic information of all available names in the genus and species levels published by the end of 1999; the taxonomic information below subfamily, organized alphabetically; and the type species of genera and subgenera, including synonyms. Distributional data of species and subspecies is given per country. Detailed distributional information for strict endemics is provided, and introduced species are indicated. The series is a collective work of about one

hundred coleopterists from Europe, Japan, America, and Australia.

Leviathan 2.0 Charles S. Maier,2014-04-21 Thomas Hobbes laid the theoretical groundwork of the nation-state in *Leviathan*, his tough-minded treatise of 1651. *Leviathan 2.0* updates this classic account to explain how modern statehood took shape between the mid-nineteenth and mid-twentieth centuries, before it unraveled into the political uncertainty that persists today. Modern states were far from immune to the modernizing forces of war, technology, and ideology. From 1845 to 1880, the United States, Canada, Mexico, and Argentina were all reconstituted through territorial violence. Europe witnessed the unification of Germany and Italy, while Asian nations such as Japan tried to mitigate foreign incursions through state-building reforms. A global wave of revolution at the turn of the century pushed the modernization process further in China, Russia, Iran, and Ottoman Turkey. By the late 1930s, with the rise of the Soviet Union and Nazi Germany, the momentum of history seemed to shift toward war-glorifying totalitarian states. But several variants of the modern state survived World War II: the welfare states of Western democracies; single-party socialist governments; and governments dominated by the military, especially prevalent in Latin America, Asia, and the Middle East. Toward the end of the twentieth century, all of these forms stood in growing tension with the transformative influences of globalized capitalism. Modern statehood recreated itself in many ways, Charles S. Maier concludes, but finally had to adopt a precarious equilibrium with ever more powerful economic forces.

Stimme und Schrift Alfred Messerli,Waltraud Wiethölter,Hans Georg Pott,2008 Im Gegensatz zur Schriftkultur, die in den letzten zwei Jahrzehnten zum Thema zahlreicher Arbeiten geworden ist, hat die Erforschung der sekundären Mündlichkeit bislang noch kaum begonnen, geschweige denn von einem interdisziplinären Ansatz, wie ihn der vorliegende Band präsentiert, profitieren können. In einer Zeit, in der sich die 'Schrift' als Leitmedium der Gesellschaft etabliert, bekunden Dichter und Denker eine Erfahrung des Verlustes an Nähe und Unmittelbarkeit (Präsenz). Gegen Orientierungs- und Bindungsverlust sowie Einsamkeitserfahrungen werden kompensatorisch die Stimme (Reden, Vorlesen und Hören) und die gesellige Kommunikation unter Anwesenden beschworen. Mit der Durchsetzung der elektronischen Funkmedien im späten 19. Jahrhundert (Telefon, Radio) und im späten 20. Jahrhundert dem Internet verändert sich die Situation jeweils ein

A Companion to the Works of Heinrich Von Kleist Bernd Fischer, 2003 For over 150 years, Heinrich von Kleist (1777-1811) has been one of the most widely read and performed German authors. His status in the literary canon is firmly established, but he has always been one of Germany's most contentiously discussed authors. Today's critical debate on his unique prose narratives and dramas is as heated as ever. Many critics regard Kleist as a lone presager of the aesthetics and philosophies of late nineteenth- and early twentieth-century modernism. Yet there can be no question that he responds in his works and letters to the philosophical, aesthetic, and political debates of his time. During the last thirty years, the scholarship on Kleist's work and life has departed from the existentialist wave of the 1950s and early 1960s and opened up new avenues for coming to terms with his unusual talent. The present volume brings together the most important and innovative of these newer scholarly approaches: the essays include critically informed, up-to-date interpretations of Kleist's most-discussed stories and dramas. Other contributions analyze Kleist's literary means and styles and their theoretical underpinnings. They include articles on Kleist's narrative and theatrical technique, poetic and aesthetic theory, philosophical and political thought, and insights from new biographical research. Contributors: Jeffrey L. Sammons, Jost Hermand, Anthony Stephens, Bianca Theisen, Hinrich C. Seeba, Bernhard Greiner, Helmut J. Schneider, Tim Mehigan, Susanne Zantop, Hilda M. Brown, and Seán Allan. Bernd Fischer is Professor of German and Head of the Department of German at Ohio State University.

Pestalozzi and the Educationalization of the World D. Tröhler, 2013-09-09 Johann Heinrich Pestalozzi transformed education theory and practice worldwide. Daniel Tröhler connects Pestalozzi's work to its context in Europe's late 18th- and early 19th-century republican movement, offering readers a way to understand the sociopolitical significance of education and its central role in the development of modern societies.

Organic Computing — A Paradigm Shift for Complex Systems Christian Müller-Schloer, Hartmut Schmeck, Theo Ungerer, 2011-04-29 Organic Computing has emerged as a challenging vision for future information processing systems. Its basis is the insight that we will increasingly be surrounded by and depend on large collections of autonomous systems, which are equipped with sensors and actuators, aware of their environment, communicating freely, and organising themselves in order to perform actions and services required by the users. These networks of intelligent systems surrounding us open fascinating application areas and at the same time bear the problem of their controllability. Hence, we have to construct such systems as robust, safe, flexible, and trustworthy as possible. In particular, a strong orientation towards human needs as opposed to a pure implementation of the technologically possible seems absolutely central. The technical systems, which can achieve these goals will have to exhibit life-like or organic properties. Organic Computing Systems adapt dynamically to

their current environmental conditions. In order to cope with unexpected or undesired events they are self-organising, self-configuring, self-optimising, self-healing, self-protecting, self-explaining, and context-aware, while offering complementary interfaces for higher-level directives with respect to the desired behaviour. First steps towards adaptive and self-organising computer systems are being undertaken. Adaptivity, reconfigurability, emergence of new properties, and self-organisation are hot topics in a variety of research groups worldwide. This book summarises the results of a 6-year priority research program (SPP) of the German Research Foundation (DFG) addressing these fundamental challenges in the design of Organic Computing systems. It presents and discusses the theoretical foundations of Organic Computing, basic methods and tools, learning techniques used in this context, architectural patterns and many applications. The final outlook shows that in the mean-time Organic Computing ideas have spawned a variety of promising new projects.
