*Environmental Science* William P. Cunningham,Mary Ann Cunningham,Barbara Woodworth Saigo,2003-03 This book is intended for use in a one- or two-semester course in environmental science, human ecology, or environmental studies at the college or advanced placement high school level. Because most students who will use this book are freshman or sophomore nonscience majors, the authors have tried to make the text readable and accessible without technical jargon or a presumption of prior science background. At the same time, enough data and depth are presented to make this book suitable for many upper-division classes and a valuable resource for students who will keep it in their personal libraries after their formal studies are completed.The goal of this book is to provide an up-to-date, introductory view of essential themes in environmental science along with emphasis on details and case studies that will help students process and retain the general principles.

*Textbook of Environmental Science and Technology* M. Anji Reddy,2007

*The Environment* Mohan K. Wali,Fatih Evrendilek,M. Siobhan Fennessy,2009-07-30 Strongly grounded in the scientific method and evidence, *The Environment: Science, Issues, and Solutions* presents an organized, accessible, building block approach that introduces the principles of ecology. This book examines the effects of technology use and the unprecedented economic growth and development that has tipped the natural balance of the environment, resulting in serious local, regional, and global environmental problems. This comprehensive text explores the need for interrelated long-term solutions for the prevention and mitigation of environmental problems.
