International Cooperation Against All Odds Mai'a K. Davis Cross, 2023-11-03 *International Cooperation Against All Odds: The Ultrasocial World* recasts how we understand international relations through an examination of how the human evolutionary predisposition to be ultrasocial as a species impacts which political ideas succeed, transform, manipulate, and inspire on a global scale. At a time when pessimism about our current world order is at an all-time high, this book overturns widespread assumptions that international relations is mainly about conflict, power, and national self-interest. In the last 10-20 years, scientists have discovered that as a species, we are biologically hard-wired, soft-wired, and pre-wired to be other-regarding and cooperative. Humans are an ultrasocial species, and yet this predisposition is completely ignored in governments across the world. Political leaders, experts, and the media have cultivated a myopic vision of global conflict, feeding an obsession on crises of the moment, rather than recognizing frequent and significant breakthroughs in peaceful cooperation and overall trends in the decline of violence. This book shows how time and time again our ultrasocial predisposition has pushed us towards big ideas that inspire and bring us together around the power of possibility. Featuring original research on international cooperation in outer-space exploration, European Union integration, nuclear weapons, and climate change, among other examples, Mai'a K. Davis Cross shows ultrasociality at work in a range of contexts. Tracing the path from social neuroscience and evolutionary biology (among others) to the power of ideas to international agreements, *International Cooperation Against All Odds* opens up an entirely new understanding of world politics. If we recognize our nature as a species and the potential we have to work together, we can start to transform institutions, and devise policies that take advantage of this. The book ends with a roadmap to promote more international cooperation, and eventually, a more stable, peaceful world order.

International Disputes and Cultural Ideas in the Canadian Arctic Danita Catherine Burke, 2017-08-22 This book explores the Canadian relationship with its portion of the Arctic region which revolves around the dramatic split between the appearance of absent-minded governance, bordering on indifference toward the region, and the raging nationalism during moments of actual and perceived challenge toward the sovereignty of the imagined "Canadian Arctic region." Canada's nationalistic relationship with the Arctic region is often discussed as a reactionary phenomenon to the Americanization of Canada and the product of government propaganda. As this book illustrates, however, the complexity and evolution of the

Canadian relationship with the Arctic region and its implication for Canada's approach toward international relations requires a more in-depth exploration. Please be aware that an error has been noted for Table 1.1 on page 71. In this table the sub-category "Inuit" is mislabelled. It should read "Native Indians and Inuit" as the data presented represents this Canadian census sub-category which calculated all indigenous peoples and Inuit peoples together.

Collective Dismissal in the European Union: A Comparative Analysis Roberto Cosio, Filippo Curcuruto, 2016-04-24 When business imperatives require large enterprises to reorganize, involving the reduction in staff legally characterized as collective dismissal, EU directives and laws across Europe mandate specific procedures to support workers who have been made redundant and impose sanctions where regulatory or judicial scrutiny uncovers violations. It is thus essential that a clearly defined framework of the laws and jurisprudence in force in each Member State be provided for businesses and their counsel to ensure compliance and avoid sanctions. This eminently practical book, the first and only book of its kind, provides exactly such an analysis. The book is structured on a country-by-country basis, with each chapter written by an expert in the country covered and responding concisely to such questions as the following: • How is 'collective dismissal' calculated? • Which issues regarding collective layoffs' procedures trigger legal intervention? • What happens when enterprises provide incomplete or delayed information to labour unions or public officials? • When can a worker be reinstated or claim compensation? Each chapter clarifies the extent to which directives have been implemented in the Member States and whether the law in force provides workers with some more favourable treatments than EU actually requires. Jurisprudence and its practical application are analysed from the perspective of the 'law in action' rather than that of the 'law in the books'. A concluding chapter examines global standards and trends in this area of law. There is no other publication fully devoted to the subject of collective dismissal, extensively elaborated and supported with case law. As a source of reliable information as manifested in the actions of judges, lawyers, solicitors, firms, and labour unions, this book has no peers. It will be welcomed and put to use by lawyers and solicitors specializing in labour law, in-house counsel and human resources professionals at multinational companies, regulatory authorities, and labour unions, as well as by universities and centres of research in the field of European law and labour law. The editors - Roberto Cosio, Filippo Curcuruto, Vincenzo Di Cerbo and Giovanni Mammone - all have extensive experience in judicial and administrative practice related to EU labour law, particularly in Italy. All are well-known authors in this field.

Towards a Segmented European Political Order Jozef Bátora, John Erik Fossum, 2019-11-08 This book makes a distinctive contribution to the crucial debate on the European Union (EU)'s present and future development. It systematically examines how the range of crises and challenges over the last decade have transformed the EU and relates those findings to the discussion of an increasingly differentiated EU. It argues that the post-crises EU shows clear signs of becoming a segmented political order with in-built biases and constraints. The book spells out the key features of such an order in

ideational and structural terms and shows how it more concretely manifests itself in the EU's institutional and constitutional make-up and in how member states constrain and condition EU action. Different states impose different types of constraints, as is underlined through paying explicit attention to the Visegrád countries. This book will be of key interest to scholars and students of EU politics/studies, European integration and politics, East European politics and foreign policy.

Modern Maritime Piracy Robert C. McCabe, 2017-09-14 This book examines the complex phenomena of modern maritime piracy. The work offers a cutting-edge analysis of modern maritime piracy in the two most pirate-prone regions - southeast Asia and northeast Africa - from the late twentieth century to the modern day. These case studies present a detailed exploration of how regional and international governments responded to upsurges of piracy and how responses have evolved over the course of the past 40 years. This analysis reveals the results of these efforts and what effect, if any, suppressing piracy at sea had on tensions and instability ashore. The book transcends a simple narrative, providing detailed and extensively researched case studies of contemporary manifestations and responses at the strategic, operational and tactical levels. New insights are offered, such as the role of external navies in the repression of piracy in northeast Africa before the well-documented escalation in 2005. In addition, this book constructs a comparative analytic framework to gauge the effectiveness and shortcomings of modern attempts to counteract piracy, which reveals lessons learned, future policy projections and wider implications. This analysis adds new classifications, innovative concepts and scholarly depth to the field of maritime security studies, naval history and theory and international relations. This book will be of much interest to students of naval history, maritime security, strategic studies and international relations.

A History of Shaolin Lu Zhouxiang, 2019-03-18 Shaolin Monastery at Mount Song is considered the epicentre of the Chan school of Buddhism. It is also well known for its martial arts tradition and has long been regarded as a special cultural heritage site and an important symbol of the Chinese nation. This book is the first scholarly work in English to comprehensively examine the full history of Shaolin Monastery from 496 to 2016. More importantly, it offers a clear grasp of the origins and development of Chan Buddhism through an examination of Shaolin, and highlights the role of Shaolin and Shaolin kung fu in the construction of a national identity among the Chinese people in the past two centuries.

A Troubled Sleep James Waller, 2021 Drawing on ethnographic fieldwork, comparative research, and over 110 hours of face-to-face interviews with a diverse range of political, academic, civil society, and community actors across Northern Ireland, Waller revisits one of the world's most deeply divided societies to analyze Northern Ireland's current vulnerabilities, and points of resilience, as an allegedly post-conflict society

The European External Action Service and National Foreign Ministries Rosa Balfour, Caterina Carta, Kristi Raik, 2015-02-28 Based on extensive empirical work by a cross-European group of researchers, this book assesses the impact of the creation of the European External Action Service (EEAS) on the national foreign policy-making processes and

institutions of the EU member states. As such, the contributions cover both the involvement of the national diplomatic and foreign policy actors in shaping the outlook of the EEAS and its mission, as well as the changes (or not) it has produced for those actors of the member states. The analysis draws in theoretical frameworks from Europeanization and socialization, but also from intergovernmental frameworks of policy-making within the European Union. An introduction by the editors outlines the issues and trends examined in the book and establishes the theoretical and methodological framework. Split into 2 sections, Part I: EEAS and national diplomacies as part of global and European structures has contributions by Richard Whitman, Rosa Balfour, Christian Lequesne, Caterina Carta and Simon Duke. Part II: National diplomacies shaping and being shaped by the EEAS is covered by Daniel Fiott, Fabien Terpan, Cornelius Adebahr, Andrea Frontini, Ignacio Molina and Alicia Sorroza, Laura C. Ferreira-Pereira, Alena Vysotskaya G. Vieira and Louise van Schaik, Grzegorz Gromadzki, Mark Rhinard, Jakob Lewander and Sara Norrevik, Sabina Kajnc Lange, Ruby Gropas and George Tzogopoulos, Vít Benes and Kristi Raik. This book is much needed, especially in an era when the EU is trying to pull its weight in the international sphere (e.g. Syria, Iran, the Arab Spring, Chinese relations and emerging powers) but also at a time when the EU is trying to recalibrate its institutional structure in light of the current financial predicaments and questions on the democratic legitimacy of the European project.

Brazil Patrick Howlett-Martin, 2015-12-01 One of the key elements in Brazil's foreign policy is his challenge to the distribution of power on the international level. The current system of world governance is considered unfavorable to developing countries and unfavorable to Brazilian interests. Hence Brazil's efforts with developing countries and its BRICS partners to work together to replace hegemony and unilateralism with a greater democratization of world governance.

The UK Regional-National Economic Problem Philip McCann, 2016-03-10 In recent years, the United Kingdom has become a more and more divided society with inequality between the regions as marked as it has ever been. In a landmark analysis of the current state of Britain's regional development, Philip McCann utilises current statistics, examines historical trends and makes pertinent international comparisons to assess the state of the nation. The UK Regional-National Economic Problem brings attention to the highly centralised, top down governance structure that the UK deploys, and demonstrates that it is less than ideally placed to rectify these inequalities. The 'North-South' divide in the UK has never been greater and the rising inequalities are evident in almost all aspects of the economy including productivity, incomes, employment status and wealth. Whilst the traditional economic dominance of London and its hinterland has continued along with relative resilience in the South West of England and Scotland, in contrast the Midlands, the North of England, Northern Ireland and Wales lag behind by most measures of prosperity. This inequality is greatly limiting national economic performance and the fact that Britain has a below average standard of living by European and OECD terms has been ignored. The UK's economic and governance inequality is unlikely to be fundamentally rebalanced by the current governance and connectivity trends, although this definitive study suggests that some areas of improvement are possible if they are well implemented. This pivotal analysis is essential reading for postgraduate students in economics and urban studies as well as researchers and policy makers in local and central government.

Handbook of Geotourism Ross Dowling, David Newsome, 2018-10-26 Ross Dowling and David Newsome present an original, substantial and much-needed contribution to the field which will further our understanding of geotourism in theory and practice. This Handbook defines, characterizes and explores the subject through a range of international perspectives and case studies, identifying geotourism as a rapidly emerging form of urban and regional sustainable development. With extensive case studies from North and South America, Europe, Asia, Australasia and Africa, this global Handbook examines and explains the relationship between geology and tourism. Thematically arranged sections cover the relationship of geology with tourism, sustainability and society, geotourism in urban areas, and interpretation and education strategies. The final two sections assess geotourism's impact through wide-ranging case studies of UNESCO global geoparks and geotourism in a range of countries. The eminent academics and practitioners demonstrate how geotourism is a vehicle future for engaging the public and protecting geosites, as well as emphasising the importance of sustainability. An essential resource for students and educators, this Handbook provides an international perspective for those interested in tourism, environmental geography, ecology and geology. Written with practitioners in mind, this book reveals how tourism professionals and

geologists can build a common vision by working together in sharing knowledge at the nexus of geology and tourism. Contributors include: M. Allan, E. Aparecida Del Lama, R.S. Aquino, A. Asrat, N. Routledge Handbook of European Elections Donatella M. Viola, 2015-08-14 The Routledge Handbook of European

Elections explores the multifaceted dimension of the European Parliament's (EP) electoral contests across the European Community and European Union since 1979. After setting a general empirical and theoretical framework, this collaborative project presents original contributions from leading experts from virtually all the corners of the European Union. Each case study adheres to a common template that makes it easy to compare data, methodology and outcomes. Every country chapter includes: a brief geopolitical profile and historical background of the Member State; a glance at the national political landscape; a short account of the main political parties, including their attitude toward the European Union; a section on public opinion and European integration; a summary of electoral systems; an overview of all EP and national elections; an in-depth analysis of the 2009 EP electoral race; an overall theoretical interpretation of European elections. A comparative chapter closes the Handbook followed by an Epilogue focussing on the 2014 EP contest with a detailed analysis of the newly elected European Assembly in terms of political group and gender composition. The volume aims to enhance readers' understanding of the European Parliament and revive their interest in the European integration process. By providing a wide range of national and European facts and figures, this investigation represents a comprehensive reference guide to scholars, practitioners, and students of the European Parliament, European elections, political parties, European Union and comparative politics.

Leadership, Authority and Representation in British Muslim Communities Sophie Gilliat-Ray, Riyaz Timol, 2021-01-26 The contributions explore Muslim religious leadership in multiple forms and settings. While traditional authority is usually correlated with theology and piety, as in the case of classically trained ulema, the public advocacy of Muslim community concerns is often headed by those with professionalized skillsets and civic experience. In an increasingly digital world, both women and men exercise leadership in novel ways, and sites of authority are refracted from traditional loci, such as mosques and seminaries, to new and unexpected places. This collection provides systematic focus on a topic that has hitherto been given rather diffuse consideration. It complements historical work on community leadership as well as more contemporary discussion on the training and role of Islamic religious authorities. It will be of interest to scholars in Religious Studies, Sociology, Political Science, History, and Islamic Studies.
