Krueger,2007 TRB's Commercial Truck and Bus Safety Synthesis Program (CTBSSP) Synthesis 15: Health and Wellness Programs for Commercial Drivers explores health risks facing commercial truck and motorcoach drivers. The report examines the association between crash causation and functional impairments, elements of employee health and wellness programs that could be applied to commercial drivers, and existing trucking and motor coach employee health and wellness programs. In addition, the report includes several case studies on employee health and wellness programs in the truck and motorbus industries, focusing on the elements that

appear to work effectively.

The Handbook of Occupational and Environmental Medicine Tee L. Guidotti, 2020-10-27 Provides health professionals with a single, accessible, and interesting source to prepare for the field of occupational and environmental medicine. The new edition is extensively updated and includes questions for review in preparation for taking exams. This set is designed to be a thorough introduction for physicians entering the occupational and environmental medicine field, whether preparing for specialty examinations or moving into the field from other medical specialties or from primary care. It also serves as a convenient guide and reference for nurses, health professionals, and those outside of health care who need a quick orientation. The set is written with a strong and coherent point of view about the value of occupational and environmental medicine and commitment to ethical, worker-centered practice. It is unusual in the depth of its coverage; its inclusion of important topics that are usually overlooked in textbooks of the field, such as risk science; its emphasis on good management of occupational health services; and its thorough integration of material that fits topics together rather than presenting them as if they were separate and unrelated.

Medicolegal Death Investigation System Institute of Medicine, Board on Health Promotion and Disease Prevention, Committee for the Workshop on the Medicolegal Death Investigation System, 2003-08-22 The US Department of Justice's National Institute of Justice (NIJ) asked the Institute of Medicine (IOM) of The National Academies to conduct a workshop that would examine the interface of the medicolegal death investigation system and the criminal justice system. NIJ was particularly interested in a workshop in which speakers would highlight not only the status and needs of the medicolegal death investigation system as currently administered by medical examiners and coroners but also its potential to meet emerging issues facing contemporary society in America. Additionally, the workshop was to highlight priority areas for a potential IOM study on this topic. To achieve those goals, IOM constituted the Committee for the Workshop on the Medicolegal Death Investigation System, which developed a workshop that focused on the role of the medical examiner and coroner death investigation system and its promise for improving both the criminal justice system and the public health and health care systems, and their ability to respond to terrorist threats and events. Six panels were formed to highlight different aspects of the medicolegal death investigation system, including ways to improve it and expand it beyond its traditional response and meet growing demands and challenges. This report summarizes the Workshop presentations and discussions

that followed them.
