Truth and Truthfulness Bernard Williams, 2010-07-28 What does it mean to be truthful? What role does truth play in our lives? What do we lose if we reject truthfulness? No philosopher is better suited to answer these questions than Bernard Williams. Writing with his characteristic combination of passion and elegant simplicity, he explores the value of truth and finds it to be both less and more than we might imagine. Modern culture exhibits two attitudes toward truth: suspicion of being deceived (no one wants to be fooled) and skepticism that objective truth exists at all (no one wants to be naive). This tension between a demand for truthfulness and the doubt that there is any truth to be found is not an abstract paradox. It has political consequences and signals a danger that our intellectual activities, particularly in the humanities, may tear themselves to pieces. Williams's approach, in the tradition of Nietzsche's genealogy, blends philosophy, history, and a fictional account of how the human concern with truth might have arisen. Without denying that we should worry about the contingency of much that we take for granted, he defends truth as an intellectual objective and a cultural value. He identifies two basic virtues of truth, Accuracy and Sincerity, the first of which aims at finding out the truth and the second at telling it. He describes different psychological and social forms that these virtues have taken and asks what ideas can make best sense of them today. Truth and Truthfulness presents a powerful challenge to the fashionable belief that truth has no value, but equally to the traditional faith that its value guarantees itself. Bernard Williams shows us that when we lose a sense of the value of truth, we lose a lot both politically and personally, and may well lose everything.

Essay on Human Reason: On the Principle of Identity and Difference Nikola Stojkoski, 2018-03-15 The nature of human reason is one of the thorniest of mysteries in philosophy. The reason appears in many specific forms within general areas such as cognition, thinking, experiencing beauty, and moral judgment. These forms are “perfectly” known in philosophy, yet an unknown pattern has been noticed which shows us that they are all a variation of the same theme: truth is

an identity relation between the “thought” and “reality”; justice is an identity relation between the given and the deserved; beauty is an identity relation as rhyme is an identity relation between the final sounds of words; rhythm is an identity relation between time intervals; symmetry is an identity relation between two halves; proportion is an identity relation between two ratios; anaphora is an identity relation between the initial words. Particular things are identities in themselves and universals are identities between particulars. One idea associates another idea identical to it; an analogy is an identity between relations; induction is an identification between the known and unknown instances; and all the logic rests on the law of identity. What is common for all of them is the nature of reason itself.

Why I Write George Orwell, 2021-01-01 George Orwell set out ‘to make political writing into an art’, and to a wide extent this aim shaped the future of English literature – his descriptions of authoritarian regimes helped to form a new vocabulary that is fundamental to understanding totalitarianism. While 1984 and Animal Farm are amongst the most popular classic novels in the English language, this new series of Orwell’s essays seeks to bring a wider selection of his writing on politics and literature to a new readership. In Why I Write, the first in the Orwell’s Essays series, Orwell describes his journey to becoming a writer, and his movement from writing poems to short stories to the essays, fiction and non-fiction we remember him for. He also discusses what he sees as the ‘four great motives for writing’ – ‘sheer egoism’, ‘aesthetic enthusiasm’, ‘historical impulse’ and ‘political purpose’ – and considers the importance of keeping these in balance. Why I Write is a unique opportunity to look into Orwell’s mind, and it grants the reader an entirely different vantage point from which to consider the rest of the great writer’s oeuvre. ‘A writer who can – and must – be rediscovered with every age.’ — Irish Times

Substantive Perspectivism: An Essay on Philosophical Concern with Truth Bo Mou, 2009-09-16 I have been thinking about the philosophical issue of truth for more than two decades. It is one of several fascinating philosophical issues that motivated me to change my primary reflective interest to philosophy after receiving BS in mathematics in 1982. Some serious academic work in this connection started around the late eighties when I translated into Chinese a dozen of Donald Davidson’s representative essays on truth and meaning and when I assumed translator for Adam Morton who gave a series of lectures on the issue in Beijing (1988), which was co-sponsored by my then institution (Institute of Philosophy, Chinese Academy of Social Science). I have loved the issue both for its own sake (as one specific major issue in the philosophy of language and metaphysics) and for the sake of its significant involvement in many philosophical issues in different subjects of philosophy. Having been attracted to the analytic approach, I was then interested in looking at the issue both from the points of view of

classical Chinese philosophy and Marxist philosophy, two major styles or frameworks of doing philosophy during that time in China, and from the point of view of contemporary analytic philosophy, which was then less recognized in the Chinese philosophical circle.

Francis Bacon's Cryptic Rhymes and the Truth They Reveal Edwin Bormann,2021-06-28 This fascinating 1906 treatise explores the seminal work of Francis Bacon with particular reference to cryptic rhymes and their possible connections to the occult. Francis Bacon (1561 - 1626) was an English statesman and philosopher who served as Lord Chancellor and Attorney General of England. His works are hailed as having developed the scientific method and were influential throughout the scientific revolution. Contents include: "Francis Bacon Confesses, in the Presence of Death, to Having Written Rhymed Books", "What was Francis Bacon's Estimation of Poesy?", "Francis Bacon's Predilection for the Occult Arts", "What Part do the Words 'Name' and 'Darts' lay in Bacon's Writings?", "The Mysterious Manner of the Actor Shakespeare", "What Part does Rhyme play in Shakespeare's Dramas?", etc. Many vintage books such as this are becoming increasingly scarce and expensive. It is with this in mind that we are republishing this volume now in an affordable, modern, high-quality edition complete with the original text and artwork.

Max Wertheimer and Gestalt Theory Michael Wertheimer,2017-07-12 The ideas of Max Wertheimer (1880-1943), a founder of Gestalt theory, are discussed in almost all general books on the history of psychology and in most introductory textbooks on psychology. This intellectual biography of Wertheimer is the first book-length treatment of a scholar whose ideas are recognized as of central importance to fields as varied as social psychology, cognitive neuroscience, problem solving, art, and visual neuroscience. King and Wertheimer trace the origins of Gestalt thought, demonstrating its continuing importance in fifteen chapters and several supplements to these chapters. They begin by reviewing Wertheimer's ancestry, family, childhood in central Europe, and his formal education. They elaborate on his activities during the period in which he developed the ideas that were later to become central to Gestalt psychology, documenting the formal emergence of this school of thought and tracing its development during World War I. The maturation of the Gestalt school at the University of Berlin during 1922-1929 is discussed in detail. Wertheimer's everyday life in America during his last decade is well documented, based in part on his son's recollections. The early reception of Gestalt theory in the United States is examined, with extensive references to articles in professional journals and periodicals. Wertheimer's relationships and interaction with three prominent psychologists of the time, Edwin Boring, Clark Hull, and Alexander Luria, are discussed based on previously unpublished correspondence. The final chapters discuss Wertheimer's essays on democracy, freedom, ethics, and truth, and detail personal challenges Wertheimer faced during his last years. His major work, published after his death, is Productive

Thinking. Its reception is examined, and a concluding chapter considers recent responses to Max Wertheimer and Gestalt theory. This intellectual biography will be of interest to psychologists and readers into

Speculative Truth Russell McCormach,2004-03-18 With a never-before published paper by Lord Henry Cavendish, as well as a biography on him, this book offers a fascinating discourse on the rise of scientific attitudes and ways of knowing. A pioneering British physicist in the late 18th and early 19th centuries, Cavendish was widely considered to be the first full-time scientist in the modern sense. Through the lens of this unique thinker and writer, this book is about the birth of modern science.

From Truth and truth Francis Etheredge,2016-04-26 What emerges in this second book of the trilogy is that the very “ground” and content of experience is richer than what can be reduced to a particular account of it. As such, dialogue develops from the “natural” diversity of what is “of” faith and what is “of” reason. Neither faith nor reason, however, originates “from” experience; rather, both are “witnessed” in experience. In other words, taking up questions about the nature of man, whether philosophically, psychologically or in terms of social structures, manifests both a variety of points of departure and, at the same time, the manifold conversations that are possible in the “field of culture”. Focusing particularly on the work of St. John Paul II, the first essay examines the answer of reason and the answer of faith to the same question: What is man? Conversion, too, entails an “unexpected” relationship to natural truth, which, in its own way, is both adequate and inadequate to salvation. Communication, as it were, runs throughout these essays; however, in particular, there is a need to enrich our human understanding of the process of “coming to ourselves” with the insights of spiritual discernment. Axiomatically, however, it is possible to say that just as we come to exist through a relationship to others, so our healing and holiness are manifest through our relationship to others in the “Other”. Furthermore, while it is ultimately true that we exist as individually rooted in the social structure of our origin and the times in which we live, we need to critically participate in the dialogue which identifies our common “reality” and not live our lives covered in “psycho-social” labels of one kind or another. As a whole, then, there is an incomparable range and depth to “dialogue”. Indeed, given the many critical situations in the world, it is increasingly indispensable and essential that humanity choose the incredible wealth of dialogue in contrast to the possibility of a “polarised” and “conflictual” structure between people and peoples.
