Economic Development and Islamic Finance Zamir Iqbal,Abbas Mirakhor,2013-08-05 Although Islamic finance is one of the fastest growing segments of emerging global financial markets, its concepts are not fully exploited especially in the areas of economic development, inclusion, access to finance, and public policy. This volume is to improve understanding of the perspective of Islamic finance on economic development, social and economic justice, human welfare, and economic growth.

Labor Economics in an Islamic Framework Toseef Azid,Umar Burki,Muhammad Junaid Khawaja,Nasim Shah Shirazi,Muhammad Tahir,2021-12-30 The labor market in Islam is governed by the Islamic laws of fairness, justice, and reward that is equivalent to the job done. Most of the literature in the field discusses the normative aspect of the labor market, whereas few attempts can be seen to address more positive aspects. There is a need for new theoretical and empirical models for the Islamic labor market, which should differ from established approaches. This book provides a comprehensive overview of the nature, scope, and dimensions of the labor market in an Islamic context, from both theoretical and practical perspectives. It presents and discusses labor economics and then compares the similarities and differences between conventional and Islamic views of the labor market, explaining where they meet, and critically justifying why they differ, under the umbrella of Shari'ah. The book raises pertinent issues, which it analyzes from both standpoints and widens the discourse to include norms, morality, and related institutions such as social security and welfare. A unique feature of the book is that it examines labor economics practices among a specific group of countries, and studies the labor conditions within these countries, where the majority of the population follow the teachings of Islam in their daily lives. The book proposes practical strategies for the development of new models for the Islamic labor market which are compatible with the modern world. The book will enable academics and practitioners of Islamic economics to make economic sense of Shari'ah compliance and human resource development.

Economic Thought of Al-Ghazali (450-505 A.H./1058-1111 A.D.) Shaikh M. Ghazanfar, Abdul Azim Islahi, 1998

Islamic Economics: Principles and Analysis Moutaz Abojeib, Muhammad Anas Zarka, Muhammad Fahim Khan, Muhammad Irwan Ariffin, Muhammad Syukri Salleh, Rifki Ismal, Rokiah Alavi, Ruzita Mohd Amin, Saiful Azhar Rosly, Selamah Abdullah Yusof, Ugi Suharto, Zubair Hasan, Adam Abdullah, Adam Ng, Akhmad Affandi Mahfudz, Ataul Huq Pramanik, Gairuzazmi Mat Ghani, Hafas Furqani, Irum Saba, Izyani Zulkifli, Kasule Twaha Ahmed, Maya Puspa Rahman, Mohammed Obaidullah, Mohd Azmi Omar, Mohd Nahar Mohd Arshad, Mohd Nizam Barom, Mohd-Pisal Zainal, Monzer Kahf, 2018-12-01 With the impressive emergence of Islamic finance as a branch of Islamic economics, the need for a solid knowledge base that encompasses theories, thoughts and applications related to the subject increased in importance. However, writing about Islamic economics is a great challenge due to the differences in opinion on many of its issues. This includes methodologies for determining the Islamic perspective on economic concepts and issues as well as applicable solutions for today's economic and social problems. It is further argued that Islamic economics topics are not as clear as those in conventional economics as they have their own religious, spiritual and social dimensions. The points of controversy have generated lengthy discussions. Moreover, Islamic economics encompasses a vast array of topics and approaches, from the purely theoretical, which may include philosophy or religious ideas, to mathematical and quantitative analyses. We tried our best throughout this textbook to simplify, clarify and summarise these concepts to make them accessible to all readers including students, practitioners, academics and even interested non-specialists. This textbook presents, discusses and analyses various topics and issues related to Islamic economics ranging from philosophical, epistemological and methodological to microeconomic and macroeconomic perspectives. In this endeavour, the social aspect of Islamic economics—an essential part of the discipline—is not neglected. The textbook compares Islamic ideas and concepts related to economics with those in conventional economics to highlight Islamic economics as a distinct field of knowledge with an emphasis on the ethical and social aspects. The authors have tried their level best to explain the theoretical concepts as simply as possible without ignoring today's realities and without compromising Sharī'ah principles and objectives. One of the main objectives of the book is to provide the reader with Islamic economic ideas and solutions that are realistic and applicable within the current highly globalised economic and business environment, which is largely dominated by conventional interest-based systems and institutions. Despite being written for an elementary-level audience, this textbook can also be beneficial to a wide range of specialist and non-specialist readers and seekers of knowledge. For those specialising in Islamic economics, it is an appropriate source of reference to

gain an overview on different topics relating to the foundations of Islamic economics. At this point, however, it must be mentioned that each topic deliberated upon, by its nature, would require a book on its own to cover all its aspects. Therefore, further exploration is required for Islamic economics specialists. A list of references and recommended readings is provided for that purpose at the end of each chapter. On the other hand, students of mainstream economics, finance and other academic majors will find this textbook an excellent resource for comprehensive knowledge of Islamic economics and its related issues. Universities may benefit from the different topics presented in this textbook in designing or preparing their economics courses at different levels based on their own curriculums and classes. This textbook could be used at the undergraduate level or even for a master's level economics or Islamic economics course, especially in an Islamic banking and finance programme or for an MBA having a specialisation in Islamic banking and finance where an economics or Islamic economics course is offered. Furthermore, practitioners and interested readers who are seeking essential and simple knowledge about Islamic economics will also find this textbook to be a helpful guide. It is important to mention here that Islamic economics literature shows wide differences among the scholars in almost every subtopic. Presenting all opinions within a limited number of pages is almost impossible. However, with the great contribution of more than 60 scholars from a wide span of countries and from various economic schools, this book represents an important attempt to present the topics and issues from various perspectives with the maximum objectivity possible. Through comprehensive content editing, the editors have striven to improve the flow of arguments, remove inconsistencies and put the ideas together in as coherent a manner as possible. However, the editors acknowledge that some biases and overlaps may still persist.

Methodology of Islamic Economics Necmettin Kizilkaya, 2019-11-05 In its pursuit to equip the reader with a basic knowledge of Islamic economics, this book divulges the micro-foundations of the discipline, and highlights the predominant schools of thought that exist in the field. It explains, in simple terms, what Islamic economics entails and how it can be studied as a science in relation to the Holy Quran, the Sunnah and the Islamic intellectual tradition based on these two sources. The book familiarizes the reader with knowledge of the basic maxims of the discipline. It then establishes the arguments that are presented by the proponents of religion-based economics, specifically Islam, and apprises readers about the aforementioned schools as they exist. A number of chapters consider the dimension of the dilemmas the discipline is facing, and the chronological progress of the field is reviewed, hence providing a comprehensive overview of the topic. The book deals with the issues about the origins of Islamic economics, the basic methodological questions, the use of the opportunities offered by fiqh in the methodological discussions and the main problems arising from the encounter with other cultures and civilizations. It offers practical solutions, despite the differing schools of thought, not unlike the development of conventional Economics where radical differences between Keynesian, Classical and Monetarist approaches existed. It concludes by incorporating some of the finest works that explain to the reader how Islamic economics may progress as a

discipline. This guide will provide both students and researchers in Comparative Economic Studies, Islamic Economics and Islamic Finance with an essential overview of the field.

Islamic Economics Ahmed El-Ashker, Rodney Wilson, 2006-10-01 This comprehensive survey of Islamic economic thought covers the development of ideas from the early Muslim jurists to the period of the Umayyads and Abbasids. The economic concerns of the Ottomans, Safawids and Moghuls are examined, as is the profusion of more recent writing.

Islam and the Economic Challenge M. Umer Chapra, 1992 What kind of economic policy package do Islamic teachings imply? This book seeks to answer this and other related questions.

A Model for Islamic Development Shafiullah Jan, Mehmet Asutay, 2019 This book aims to explore and analyse Islamic Moral Economy (IME) as an alternative economic and social system to capitalism and socialism. It proposes a new model of Islamic development, integrating global development within an Islamic framework of spiritual development. It is argued that the failure of Muslim countries to provide basic necessities and an environment free of oppression and injustice can be overcome with this authentic Islamic development framework. In addition, this book can be an important study to identify the theological, political, social and economic boundaries for changing the society to produce IME oriented developmentalism.

The Progressive Assault on Laissez Faire Barbara H. Fried, 2009-07-01 Law and economics is the leading intellectual movement in law today. This book examines the first great law and economics movement in the early part of the twentieth century through the work of one of its most original thinkers, Robert Hale. Beginning in the 1890s and continuing through the 1930s, progressive academics in law and economics mounted parallel assaults on free-market economic principles. They showed first that private, unregulated economic relations were in fact determined by a state-imposed regime of property and contract rights. Second, they showed that the particular regime of rights that existed at that time was hard to square with any common-sense notions of social justice. Today, Hale is best known among contemporary legal academics and philosophers for his groundbreaking writings on coercion and consent in market relations. The bulk of his writing, however, consisted of a critique of natural property rights. Taken together, these writings on coercion and property rights offer one of the most profound and elaborated critiques of libertarianism, far outshining the better-known efforts of Richard Ely and John R. Commons. In his writings on public utility regulation, Hale also made important contributions to a theory of just, market-based distribution. This first, full-length study of Hale's work should be of interest to legal, economic, and intellectual historians.

Ethics and Economics Syed Nawab Haider Naqvi, 1981 Monograph on ethics and economics in an Islamic perspective - describes ethical philosophy, value system, basic characteristics, institutional framework and objectives of an Islamic economic system, and Islamic viewpoints on economic doctrines, includes guidelines for economic policy and social policy, and contrasts with capitalism, and the welfare state. References.

Introduction to Islamic Economics Hossein Askari, Zamir Iqbal, Abbas Mirakhor, 2015-02-16 Gain deeper insight into the principles and theory of Islamic economics Introduction to Islamic Economics: Theory and Application provides an overview of the organizing principles and fundamentals of an Islamic economy. With deep discussion of the characteristics, rationale, key institutions, objectives, and instruments at work, the book addresses the core economic principles underlying a system based on the foundational teachings of Islam, and examines the implications for economic policies. Social welfare, economic justice, market functionality, efficiency, and equity are explored from an Islamic perspective, and the role and instruments of fiscal and monetary policy in Islamic systems are used to illustrate contemporary applications. Universities around the globe are offering courses on Islamic economics and finance, but despite the industry's rapid growth, most research has been focused on the financial principles rather than underlying economic principles. The first book of its kind, Introduction to Islamic Economics brings all the key concepts together into one reference volume. By outlining the ways in which Islamic finance and Islamic economics interrelate, this book can help readers to: Develop an understanding of the Islamic economic system and its institutional scaffolding Differentiate between the major characteristics of the dominant conventional economy and one based on the fundamental sources of Islam Understand the conditions that must be met for a just, well-balanced, stable, and growing economy Clarify the role of State, public policy, and risk-sharing in the Islamic financial system The Islamic financial system is expanding quickly, and those looking to increase their relevance in a changing economic landscape must get up to speed. Introduction to Islamic Economics provides a comprehensive overview of underlying economic system offering a deeper understanding of the feature of the system. This book is an excellent complement to Introduction to Islamic Finance, 2E by Iqbal and Mirakhor.

Information Sources on Islamic Banking and Economics S. Nazim Ali, Naseem N. Ali, 1994-01-10 Islamic banking and economics (IBE) is a fast-growing subject of vital interest in both East and West as Muslims change their attitudes towards investments and find ways to invest their funds according to the Islamic faith. Along with the rapid developments in Islamic banking there has been a concomitant increase in the quantity of relevant IBE mat

Right to Education, Work and Welfare in Islam Mohammad Hashim Kamali, 2010 Continuing from his earlier discussions of fundamental human rights from an Islamic perspective, Professor M.H. Kamali discusses in this volume a person's right to education, work and welfare. The following subjects are discussed: a classification of knowledge from the Islamic perspective, children's education, academic freedom, science and religion; the value of work, work ethics, fair trading, workers' rights; the obligations of society and the state towards those who are in need, the obligations of individuals,

the establishment and objectives of charities--Provided by publisher.

Economics of an Islamic Economy Rauf A. Azhar, 2010 This book challenges the interventionist stance of Islamic economics as well as its presumption that riba equals interest. An Islamic economy, it argues, is essentially a market economy, but it differs from capitalist economies because both its institutions and the structure of, for example, property rights are specifically Islamic, deriving from Qur'an and other sources of Islamic law. The book also focuses on the similarities and differences between riba and interest, establishes the often neglected connection between the two, and explores the ramifications of this connection for Islamic financial systems.
