Cognitive Psychology E. Bruce Goldstein,2011 Connecting the study of cognition to everyday life in an unprecedented way, E. Bruce Goldstein's COGNITIVE PSYCHOLOGY, International Edition gives equal treatment to both the landmark studies and the cutting-edge research that define this fascinating field. The text employs a wealth of concrete examples and illustrations that help students understand the theories of cognition—driving home both the scientific importance of the theories and their relevance to students' daily lives. Goldstein's accessible narrative style blends with an art program that makes difficult concepts understandable. Students gain a true understanding of the behind the scenes activity that happens in the mind when humans do such seemingly simple activities as perceive, remember, or think. Goldstein's also focuses on the behavioral and physiological approaches to cognition by including physiological materials in every chapter. As is typical of his work, this is a major revision that reflects the most current aspects of the field. To help reinforce concepts, the text is packaged with COGLAB 2.0: THE ONLINE COGNITIVE PSYCHOLOGY LABORATORY, which gives both students and instructors the chance to participate as subjects in research experiments.

This pack also contains *CogLab* on a CD, Version 2.0, International Edition, 4th Edition. *COGLAB 2* is an interactive online laboratory where students can run demonstrations of more than 40 classical experiments and concepts from cognitive psychology. *COGLAB 2* lets the instructor set up an online class group to track the results of students' experiences with each of the interactive cognitive demonstrations. The class is then able to collect and analyze real data based on their specific class group. This hands-on experience helps students understand each experiment, its underlying cognitive concepts, the data, and the significance of the study.

Concept Maps and CogLab Online Manual for Goldstein's Cognitive Psychology E. Bruce Goldstein, Randall Baker, Angie MacKewn, 2005 Each chapter will begin with five Concept Maps per chapter to help students outline major concepts and provide a visual overview of the relationships between concepts. For example, what are the processes involved in storing information in long-term memory. These maps will be designed to allow for active review and rehearsal by the student, and it will call upon them to apply the concepts to their own lives. *Coglab's Online Manual* will be specific to Goldstein, and organized in the ordering of Goldstein's chapters. Each experiment will provide a setup for the experiment, instructions on what to do to participate in the experiment, and there will be specific review questions at a basic, advanced level, together with more advanced discussion questions that are tailored specifically to Goldstein's book.
