Citizenship and Civil Society Thomas Janoski, 1998-02-13 This book shows how legal, political, social, and participation rights are systematically related to liberties, claims and immunities.

Television and Its Viewers James Shanahan, Michael Morgan, 1999-09-09 Television and its Viewers reviews 'cultivation' research, which investigates the relationship between exposure to television and beliefs about the world. James Shanahan and Michael Morgan, both distinguished researchers in this field, scrutinize cultivation through detailed theoretical and historical explication, critical assessments of methodology, and a comprehensive 'meta-analysis' of twenty years of empirical results. They present a sweeping historical view of television as a technology and as an institution. Shanahan and Morgan's study looks forward as well as back, to the development of cultivation research in a new media environment. They argue that cultivation theory offers a unique and valuable perspective on the role of television in twentieth-century social life. Television and its Viewers, the first book-length study of its type, will be of interest to students and scholars in communication, sociology, political science and psychology and contains an introduction by the seminal figure in this field, George Gerbner.

Brucella Ignacio López-Goñi, David O'Callaghan (Prof.), 2012 Brucella is a genus of Gram-negative, facultative, intracellular bacteria that are highly pathogenic for a variety of mammals, including humans. Recently, the World Health Organization cited brucellosis to be the world's most widespread zoonosis. An important feature of the pathogenicity of these organisms is their ability to survive and replicate within the host macrophages. However, the mechanism for this is unclear. In addition, none of the classical bacterial virulence factors found in other bacterial pathogens have been found in the genomes of the 40 Brucella species and biovars analyzed to date. Nevertheless, the application of systems biology

approaches in recent years has transformed research, permitting fascinating new insights into *Brucella* molecular biology and genomics. Written by highly acclaimed *Brucella* scientists, this book comprehensively reviews the most important advances in the field. The opening chapters focus on genetic diversity within *Brucella*, covering both classical and new species. Particular emphasis is given to how comparative genomics has led to advances in molecular diagnostics, taxonomy, and phylogeny. Additional chapters cover proteomic analysis, transcriptomic analysis, the VirB type IV secretion system, signaling complexes - e.g. the BvrR/BvrS two-component regulatory system and quorum sensing. These chapters highlight the intricate interplay between factors involved in virulence. Another chapter discusses the role of the *Brucella* cell envelope in bacterial virulence and evasion of host defenses, and the final two chapters review the current strategies for the development of novel antibacterial agents and improved vaccines. This volume is essential reading for everyone with an interest in *Brucella* and brucellosis. It is also recommended for cellular microbiologists and immunologists, and vaccine development scientists, as well as a wider body of scientists, veterinarians, and MDs with an interest in microbial diagnostics, microbial pathogenesis, and host-parasite interactions.

New Directions in Conservation Medicine A. Alonso Aguirre, Richard Ostfeld, Peter Daszak, 2012-06-08 *New Directions of Conservation Medicine: Applied Cases of Ecological Health* covers topics from emerging diseases and toxicants to the EcoHealth/One Health explosion. It challenges the notion that human health is an isolated concern removed from the bounds of ecology and species interactions.

Causative and Perception Verbs Maria Teresa Guasti,1993 Egalement, elle propose que la formation des constructions causatives dépend de la contrainte sémantique sur l'objet du verbe enchâssé.

Relevance and Linguistic Meaning Diane Blakemore,2002-09-26 The importance of discourse markers (words like 'so', 'however', and 'well') lies in the theoretical questions they raise about the nature of discourse and the relationship between linguistic meaning and context. They are regarded as being central to semantics because they raise problems for standard theories of meaning, and to pragmatics because they seem to play a role in the way discourse is understood. In this new and important study, Diane Blakemore argues that attempts to analyse these expressions within standard semantic frameworks raise even more problems, while their analysis as expressions that link segments of discourse has led to an unproductive and confusing exercise in classification. She concludes that the exercise in classification that has dominated discourse marker research should be replaced by the investigation of the way in which linguistic expressions contribute to the inferential processes involved in utterance understanding.

Rational Principles of Pianoforte Technique Alfred Cortot,2013

Motives for Language Change Raymond Hickey,2003-01-16 This specially commissioned volume considers the processes involved in language change and the issues of how they can be modelled and studied. The way languages change offers an insight into the nature of language itself, its internal organisation, and how it is acquired and used. Accordingly, the phenomenon of language change has been approached from a variety of perspectives by linguists of many different orientations. This book, originally published in 2003, brings together an international team of leading figures from different areas of linguistics to re-examine some of the central issues in this field and also to discuss new proposals. The volume is arranged into sections, including grammaticalisation, the typological perspective, the social context of language change and contact-based explanations. It seeks to cover the subject as a whole, bearing in mind its relevance for the general analysis of language, and will appeal to a broad international readership.

Semantics from Different Points of View R. Bäuerle,U. Egli,A.v. Stechow,2013-04-09

Media Effects James Shanahan,2020-10-14 Does exposure to media violence make us more violent? Do stereotypes in the media affect the way we see different social groups? Do media institutions play any role in social change? Media Effects is a concise introduction which studies the ways in which media use affects society. James Shanahan explores how researchers and society became interested in media effects, outlines the important developments in the field, and looks at

how research on narrative is playing a progressively important role in revealing what we know. The book also provides a timely interweaving of different perspectives, ranging from concerned and critical voices within media studies to quantitative psychological approaches which tend to be more sceptical about powerful media effects. Concise and authoritative, *Media Effects* is the go-to text for students and scholars getting to grips with this fascinating and important topic.

Coherence and Grounding in Discourse Russell S. Tomlin,1987-01-01 This volume seeks to expand our understanding of the relation holding between discourse relations, cognitive units, and linguistic coding. The twenty contributions in this collection explore one or more of the following themes: How point of view, or the salience of information in discourse, affects the organizational coherence of text and discourse; the concept of cognitive and linguistic event and how events are reflected in text and discourse organization; the nature of linguistic coding of events and other kinds of significant information; and the cognitive bases or cognitive correlates of the linguistic organization of discourse.

Theoretical and Crosslinguistic Approaches to the Semantics of Aspect Susan D. Rothstein,2008-03-20 The papers in this volume investigate the semantics of aspect from both a theoretical and a crosslinguistic point of view, in a wide range of languages from a number of different language families. The papers are all informed by the belief that a thorough exposure to the expression of aspect crosslinguistically is crucial for progress in understanding how the semantics of aspect works and what the semantic basis of aspectual distinctions is. The languages discussed include Russian, English, Dutch, Hebrew, Mandarin, Japanese and Kalaallisut. The issues discussed in this volume include the centrality of measuring and counting in an understanding of telicity; the importance of the singular/plural distinction in the study of aspect; the importance of homogeneity as a property of event types; the flexibility of lexical classes; and the interaction between expressions of aspect and the particular morphosyntactic structure of a language.

Verbal Complement Clauses Claudia Felser,1999-01-01 This monograph examines the syntax of bare infinitival and participial complements of perception verbs in English and other European languages, and investigates the general

conditions under which verbal complement clauses are licensed. The introductory chapter is followed by an overview of the major syntactic and semantic characteristics of non-finite complements of perception verbs in English. The third chapter presents an analysis within the framework of Chomsky's (1995) Minimalist Program according to which event-denoting complements are minimally realised as projections of an aspectual head. In the next chapter, it is argued that verbs capable of licensing aspectual complement clauses must be able to function as a special type of control predicate, an assumption which is shown to account for a number of seemingly unrelated properties of the constructions under consideration. The final chapter examines syntactically reduced clausal complements from a cross-linguistic perspective, showing that Southern Romance languages differ from Germanic ones with respect to the availability of 'bare' aspectual complement clauses, a difference that is attributed to morphological properties of verbs in these languages.
