**The Museum of Augustus** Peter Heslin,2015-05-01 In the Odes, Horace writes of his own work, “I have built a monument more enduring than bronze,”—a striking metaphor that hints at how the poetry and built environment of ancient Rome are inextricably linked. This fascinating work of original scholarship makes the precise and detailed argument that painted illustrations of the Trojan War, both public and private, were a collective visual resource for selected works of Virgil, Horace, and Propertius. Carefully researched and skillfully reasoned, the author’s claims are bold and innovative, offering a strong interpretation of the relationship between Roman visual culture and literature that will deepen modern readings of Augustan poets. The Museum of Augustus first provides a comprehensive reconstruction of paintings from the remaining fragments of the cycle of Trojan frescoes that once decorated the Temple of Apollo in Pompeii. It then finds the echoes of these paintings in the Augustan-dated Portico of Philippus, now destroyed, which was itself a renovation of Rome’s de facto temple of the Muses—in other words, a museum, both in displaying art and offering a meeting place for poets. It next examines the responses of the Augustan poets to the decorative program of this monument that was intimately connected with their own literary aspirations. The book concludes by looking at the way Horace in the Odes and Virgil in the Georgics both conceptualized their poetic projects as temples to rival the museum of Augustus.

**Mao's Cultural Army** Brian James DeMare,2015-04-02 This study explores the role of drama troupes that were tasked with roaming the countryside in support of Mao's communist revolution in China. Caught between the party and their audiences, the book illustrates how drama troupes, through performance, attempted to resist the ever growing reach of the People's Republic of China state.

*The Imagined Immigrant* Ilaria Serra,2009 Using original sources--such as newspaper articles, silent movies, letters, autobiographies, and interviews--Ilaria Serra depicts a large tapestry of images that accompanied mass Italian migration to the U.S. at the turn of the twentieth century. She chooses to translate the Italian concept of immaginario with the Latin imago that felicitously blends the double English translation of the word as imagery and imaginary. Imago is a complex knot of collective representations of the immigrant subject, a mental production that finds concrete expression; impalpable, yet real. The imagined immigrant walks alongside the real one in flesh and rags.

**Europe and Empire** Massimo Cacciari,2016 Assesses the current situation of Europe ten years after the adoption of the

single currency. Examines the genealogy of the idea of Europe from the Greek confrontation with the Asia to the conflict between the Roman Empire and Christianity. Discusses the role of secularization in the shaping of modern Europe--

**Achilleid** Publius Papinius Statius,Oswald Ashton Wentworth Dilke,Robert W. Cowan,2005 Statius' Achilleid is perhaps the most remarkable of all Latin epic poems. Its project - to tell the whole life of Achilles - was cut short by the poet's untimely death. Yet the completed first book and the earliest part of the second have a charm and freshness matched only in some of Ovid's most lively and engaging work. The poem tells how the sea-nymph Thetis, in a vain attempt to save her son from his destined end in the Trojan war, hid him on the island of Scyros, disguised as a girl. There he fell in love with the beautiful Deidamia, but at the same time, with the idea of glory in war. His feminine disguise was eventually penetrated by Ulysses and Diomedes, who tricked him into exposure of his truly warlike aspirations. In relating this story Statius explores the nature of gender and the limits of the epic genre, while playfully and wittily positioning himself in the epic - and wider - poetic tradition. These themes are explored in a new introduction by Robert Cowan, which surveys the latest research on the poem. Its assessment, very much in the modern critical manner, contrasts with and complements the traditional textual and philological commentary by O.A.W. Dilke. The combination of these two distinct approaches will assist undergraduates and postgraduates in reading the text, and, at the same time, it will provide a valuable resource for the more advanced scholar.

**The Historiography of Modern Architecture** Panayotis Tournikiotis,2001-02-27 The history of modern architecture as constructed by historians and key texts. Writing, according to Panayotis Tournikiotis, has always exerted a powerful influence on architecture. Indeed, the study of modern architecture cannot be separated from a fascination with the texts that have tried to explain the idea of a new architecture in a new society. During the last forty years, the question of the relationship of architecture to its history—of buildings to books—has been one of the most important themes in debates about the course of modern architecture. Tournikiotis argues that the history of modern architecture tends to be written from the present, projecting back onto the past our current concerns, so that the beginning of the story really functions as a representation of its end. In this book the buildings are the quotations, while the texts are the structure. Tournikiotis focuses on a group of books by major historians of the twentieth century: Nikolaus Pevsner, Emil Kaufmann, Sigfried Giedion, Bruno Zevi, Leonardo Benevolo, Henry-Russell Hitchcock, Reyner Banham, Peter Collins, and Manfredo Tafuri. In examining these writers' thoughts, he draws on concepts from critical theory, relating architecture to broader historical models.

*Geometry of the Passions* Remo Bodei,2018-01-01 The passions have long been condemned as a creator of disturbance and purveyor of the temporary loss of reason, but as Remo Bodei argues in Geometry of the Passions, we must abandon the perception that order and disorder are in a constant state of collision. By means of a theoretical and historical analysis, Bodei interprets the relationship between passion and reason as a conflict between two complementary logics. Geometry of the Passions investigates the paradoxical conflict-collaboration between passions and reason, and between individual and political projects. Tracing the roles passion and reason have played throughout history, including in the political agendas of Descartes, Hobbes, and the French Jacobins, Geometry of the Passions reveals how passion and reason may be used as a vehicle for affirmation rather than self-enslavement.
