The Agrarian History of England and Wales: Volume 3, 1348-1500 Edward Miller, H. P. R. Finberg, Joan Thirsk, 1967 The third volume of The Agrarian History of England and Wales, which was first published in 1991, deals with the last century and a half of the Middle Ages. It concerns itself with the new demographic and economic circumstances created in large measure by endemic plague.

The Invention of Comfort John E. Crowley, 2003-05-01 A history and analysis of the development of domestic design in early modern Britain and America. How did our modern ideas of physical well-being originate? As John Crowley demonstrates in *The Invention of Comfort*, changes in sensible technology owed a great deal to fashion-conscious elites discovering discomfort in surroundings they earlier had felt to be satisfactory. Written in an engaging style that will appeal to historians and material culture specialists as well as to general readers, this pathbreaking work brings together such disparate topics of analysis as climate, fire, food, clothing, the senses, and anxiety—especially about the night. “Riveting. . . . A solid contribution to the literature on the cultural impact of gentility, refinement, and the “baubles of Britain” in England and its colonial possessions.” —*Journal of American History* “Crowley provides a masterly search and survey that no historian of material culture should miss, and every curious reader should consider.” —Eugen Weber, Phi Beta Kappa Key Reporter “A comprehensive and tight study . . . a valuable contribution to the field, [and] one that is enjoyable to read.” —Emma Hart, *English Historical Review* “The sheer range of evidence, the interweaving of themes, and the overall strength of the argument mean [this] is an ideal book for specialists and students alike.” —Helen Clifford, *Journal of Design History* “*The Invention of Comfort* is an important and thought-provoking book that challenges our understanding of why people live that way they do.” —Marie Morgan, *New England Quarterly*

Built to Meet Needs: Cultural Issues in Vernacular Architecture Paul Oliver, 2007-06-07 The study of vernacular architecture explores the characteristics of domestic buildings in particular regions or localities, and the many social and cultural factors that have contributed to their evolution. In this book, vernacular architecture specialist Paul Oliver brings together a wealth of information that spans over two decades, and the whole globe. Some previously unpublished papers, as well as those only available in hard to find conference proceedings, are brought together in one volume to form a fascinating reference for students and professional architects, as well as all those involved with planning housing schemes in their home

countries and overseas.

Traditional Buildings in the Oxford Region John Steane,James Ayres,2013-11-29 The pivotal position of the Oxford region in the geological and therefore building history of England is of fundamental importance to the study of traditional construction. Oxford occupies a central position on the ancient route between Northampton and Southampton and on the east - west road between London, The West Country, Wales and Ireland. For this reason, unusually for vernacular architecture, the buildings of the region were subject to a wide range of influences. This book, the fruit of twenty years research, provides an account of vernacular architecture in the Oxford region from Anglo-Saxon times to the 19th century. It begins with a discussion of methods and procedures followed by a description of building materials, stone, brick, slate and thatch. This serves as an introduction to the heart of the book, eleven chapters dealing with surveys of cruck buildings, manorial and moated sites, town houses with particular emphasis on Abingdon, and houses in the countryside from farmhouses to cottages. There are then chapters on fire hazards, public houses and public buildings. Several appendices are devoted to wall paintings, ferramenta, apotropaic marks, carpentry details, secrets under the floorboards, fireplaces, staircases and windows. The book is richly and profusely illustrated with over 500 illustrations, photographs, maps, and a particular strength, a large number of drawings of architectural details and sketch perspectives.

Vernacular Buildings Allen Noble,2013-11-27 Constancy permits the evolution of types and characteristics to be identified, even in widely spread locations. It helps trace the origins of structures, despite later modifications. And change allows one to trace the effects of difference in environment, fashion, cultural ideas and economic influences. Change and constancy operate together, although one may or other may dominate at a particular time and place. In Vernacular Buildings Allen Noble extends the global survey contained in his earlier highly successful Traditional Buildings, to cover vernacular buildings and dwellings around the world. In a truly comprehensive account, he ranges from the fazenda of the pioneer Brazilian settlers, the Masai dwellings of Tanzania and the gothic houses of Shanghai, to Virginia Hall and Parlor houses, the thatched dwellings of the Eifel region of Germany and the three -decker houses of New York. Acknowledging the value of archival research the author is also firmly convinced of the importance of field observation and the book is extensively illustrated with photographs from his own personal collection. With a comprehensive bibliography, and incorporating new material from cultural geographers, historians, folklorists and anthropologists, Vernacular Buildings is a unique survey that will be welcomed by specialists and enthusiasts alike.

Traditional Buildings Allen Noble,2009-09-18 Based on a lifelong professional and personal interest, Traditional Buildings presents a unique survey of vernacular architecture across the globe. The reader is taken on a fascinating tour of traditional building around the world, which includes the loess cave homes of central China, the stilt houses on the shores of

Dahomey, the housebarns of Europe and North America, the wind towers of Iran, the Bohio houses of the Arawak Indians of the Caribbean, and much more. Professor's Noble's extensive travels have allowed him to examine many of the building at close quarters and the richly illustrated text includes photographs from his personal collection. With its comprehensive and detailed bibliography, the work will be welcomed by experts and non-specialists alike.

Technology and Resource Use in Medieval Europe Michael Wolfe,Elizabeth Smith,2021-12-16 The 10 essays here are the result of a conference devoted to the study of medieval technology in April 1995. Taken together, they aim to help dispel the common misconception that medieval people somehow had to toil in a world bereft of technical innovation and ingenuity. The authors of the papers, all experts in their fields, show the Middle Ages not only to be a time of considerable technological development, but also the ways in which the technologies of building construction, manufacture and metallurgy were shaped by broader forces of culture, social identity, political ambition and the local environment.

Atlas of Vernacular Architecture of the World Marcel Vellinga,Paul Oliver,Alexander Bridge,2024-11-01 The first world atlas ever compiled on vernacular architecture, this comprehensive work illustrates the variety and ingenuity of the world's vernacular building traditions from a multi-disciplinary, cross-cultural and comparative approach, using over sixty world and regional maps. Mapping such diverse aspects as materials and resources, technologies, structural systems, symbolism, forms and service systems on a cross-cultural and comparative basis, the Atlas of Vernacular Architecture of the World reveals the distribution, diversity and relationships of the world's vernacular building traditions. Indicating geographical patterns, developments, lacunae and anomalies, it gives rise to new insights and understandings, stimulating new hypotheses, questions and research efforts. Augmenting the award-winning Encyclopedia of Vernacular Architecture of the World, the Atlas of Vernacular Architecture of the World constitutes a unique and unparalleled resource for anyone involved in the growing field of vernacular architecture studies, including architects, geographers, art historians, planners, folklorists, conservationists, builders, and anthropologists as well as being of use to all those working in the fields of heritage conservation, architecture, regeneration, energy efficient building, resources management, development and sustainability.

The Archaeology of Medieval Europe, Vol. 2 Jan Klapste,2011-10-31 The two volumes of The Archaeology of Medieval Europe together comprise the first complete account of Medieval Archaeology across the continent. This ground-breaking set will enable readers to track the development of different cultures and regions over the 800 years that formed the Europe we have today. In addition to revealing the process of Europeanisation, within its shared intellectual and technical inheritance, the complete work provides an opportunity for demonstrating the differences that were inevitably present across the continent - from Iceland to Sicily and Portugal to Finland.

Handbook of Material Culture Chris Tilley,Webb Keane,Susanne Kuechler,Mike Rowlands,Patricia Spyer,2006-01-05 The

study of material culture is concerned with the relationship between persons and things in the past and in the present, in urban and industrialized and in small-scale societies across the globe. The Handbook of Material Culture provides a critical survey of the theories, concepts, intellectual debates, substantive domains and traditions of study characterizing the analysis of things. It is cutting-edge: rather than simply reviewing the field as it currently exists. It also attempts to chart the future: the manner in which material culture studies may be extended and developed. The Handbook of Material Culture is divided into five sections. • Section I maps material culture studies as a theoretical and conceptual field. • Section II examines the relationship between material forms, the human body and the senses. • Section III focuses on subject-object relations. • Section IV considers things in terms of processes and transformations in terms of production, exchange and consumption, performance and the significance of things over the long-term. • Section V considers the contemporary politics and poetics of displaying, representing and conserving material and the manner in which this impacts on notions of heritage, tradition and identity. The Handbook charts an interdisciplinary field of studies that makes a unique and fundamental contribution to an understanding of what it means to be human. It will be of interest to all who work in the social and historical sciences, from anthropologists and archaeologists to human geographers to scholars working in heritage, design and cultural studies.

In the Land of the Patriarchs Noam Shoked, 2023-11-07 An on-the-ground account of the design and evolution of West Bank settlements, showing how one of the world's most contested landscapes was produced by unexpected conflicts and collaborations among widely divergent actors. Since capturing the West Bank in 1967, Israel has overseen the construction of scores of settlements across the territory's rocky hilltops. The settlements are part of a fierce political conflict. But they are not just hotly contested political ventures. They are also something more everyday: residential architectural projects. In the Land of the Patriarchsis an on-the-ground account of the design and evolution of West Bank settlements. Noam Shoked shows how settlements have been shaped not only by the decisions of military generals, high-profile politicians, and prominent architects but also by a wide range of actors, including real estate developers, environmental consultants, amateur archeologists, and Israelis who feel unserved by the country's housing system. The patterns of design and construction they have inspired reflect competing worldviews and aesthetic visions, as well as everyday practices not typically associated with the politics of the Israeli occupation. Revealing the pragmatic choices and contingent circumstances that drive what appears to be a deliberately ideological landscape, Shoked demonstrates how unpredictable the transformation of political passion into brick and mortar can be.

Invitation to Vernacular Architecture Thomas Carter, Elizabeth C. Cromley, 2005 « Invitation to Vernacular Architecture: A Guide to the Study of Ordinary Buildings and Landscapes is a manual for exploring and interpreting vernacular architecture, the common buildings of particular regions and time periods. Thomas Carter and Elizabeth Collins Cromley provide a comprehensive introduction to the field. » « Rich with illustrations and written in a clear and jargon-free

style, *Invitation to Vernacular Architecture* is an ideal text for courses in architecture, material culture studies, historic preservation, American studies, and history, and a useful guide for anyone interested in the built environment. »--

Sources for English Local History W. B. Stephens, 1981-09-10 English local and regional history has attracted widespread attention in the last twenty-five to thirty years. Its study has expanded at undergraduate and postgraduate levels in universities, polytechnics, and at other institutions of higher education, and it has long retained its popularity as a subject for adult education classes. In schools the teaching of local history in its own right, and as an ingredient of general history, environmental studies, and local and social studies, is well established, and commonly involves the use of original sources. The expansion of genealogical studies into the wider area of family history has involved many individuals and groups in the investigation of the local conditions, which existed where former generations lived and, in this pursuit, increasing use of local records has been made. Many who seek to involve themselves in this work, however, find that they are ill-equipped in the knowledge of what sources exist, where they are to be found, or what techniques are suitable in making the best use of them.

Routledge Revivals: History Workshop Series Various Authors, 2022-07-30 First published between 1975 and 1991, this set reissues 13 volumes that originally appeared as part of the History Workshop Series. This series of books, which grew out of the journal of the same name, advocated 'history from below' and examined numerous, often social, issues from the perspectives of ordinary people. In the words of founder Raphael Samuel, the aim was to turn historical research and writing into 'a collaborative enterprise', via public gatherings outside of a traditional academic setting, that could be used to support activism and social justice as well as informing politics. Some of the topics examined in the set include: mineral workers, rural radicalism, and the lives and occupations of villagers in the nineteenth century; working class association; the development of left-wing workers theatre and the changing attitudes to mass culture across the twentieth century; the changing fortunes of the East End at the turn of the century; the position of women from the nineteenth century to the present; the miners' strike of 1984-5; the social and political images of late-twentieth century London; and a three volume analysis of the myriad facets of English patriotism. This set will be of interest to students of history, sociology, gender and politics.

Beauty & Convenience Nora Pat Small, 2003 The rebuilding of New England during what architectural historians have labeled the Federal period serves as the basis for most Americans visual or mental image of rural New England. This reconstruction became very controversial as a result of the differing definitions of republican virtue, taste, beauty, and economy held by the architects, rural reformers, and those engaged in rebuilding their homes and communities during this time. What could have promoted the attacks, primarily in the agricultural press, on the new two-story-with-ell rural homes? The answer lies in the attitudes and perceptions of cultural aesthetics and the notion of republican virtue. Nora Pat Small sharpens our understanding of the important changes that occurred in the New England landscape during the Federal

period, effectively connecting her study of post-Revolutionary reform ideology and political discourse to architectural evidence; the buildings and landscapes express cultural values, aesthetic choice, and personal identity. The Author: Nora Pat Small is an associate professor of history at Eastern Illinois University. She has published articles in William & Mary Quarterly and has contributed chapters to volumes III and VII of Perspectives in Vernacular Architecture.

Twentieth-Century Building Materials Thomas C. Jester, 2014-08-01 Over the concluding decades of the twentieth century, the historic preservation community increasingly turned its attention to modern buildings, including bungalows from the 1930s, gas stations and diners from the 1940s, and office buildings and architectural homes from the 1950s. Conservation efforts, however, were often hampered by a lack of technical information about the products used in these structures, and to fill this gap *Twentieth-Century Building Materials* was developed by the U.S. Department of the Interior's National Park Service and first published in 1995. Now, this invaluable guide is being reissued—with a new preface by the book's original editor. With more than 250 illustrations, including a full-color photographic essay, the volume remains an indispensable reference on the history and conservation of modern building materials. Thirty-seven essays written by leading experts offer insights into the history, manufacturing processes, and uses of a wide range of materials, including glass block, aluminum, plywood, linoleum, and gypsum board. Readers will also learn about how these materials perform over time and discover valuable conservation and repair techniques. Bibliographies and sources for further research complete the volume. The book is intended for a wide range of conservation professionals including architects, engineers, conservators, and material scientists engaged in the conservation of modern buildings, as well as scholars in related disciplines.

Conversing by Signs Robert Blair St. George, 2000-11-09 The people of colonial New England lived in a densely metaphoric landscape—a world where familiars invaded bodies without warning, witches passed with ease through locked doors, and houses blew down in gusts of angry, providential wind. Meaning, Robert St. George argues, was layered, often indirect, and inextricably intertwined with memory, apprehension, and imagination. By exploring the linkages between such cultural expressions as seventeenth-century farmsteads, witchcraft narratives, eighteenth-century crowd violence, and popular portraits of New England Federalists, St. George demonstrates that in early New England, things mattered as much as words in the shaping of metaphor. These forms of cultural representation—architecture and gravestones, metaphysical poetry and sermons, popular religion and labor politics—are connected through what St. George calls a 'poetics of implication.' Words, objects, and actions, referentially interdependent, demonstrate the continued resilience and power of seventeenth-century popular culture throughout the eighteenth century. Illuminating their interconnectedness, St. George calls into question the actual impact of the so-called Enlightenment, suggesting just how long a shadow the colonial climate of fear and inner instability cast over the warm glow of the early national period.

Houses and Cottages of Britain R. W. Brunskill, 2000-01-01 The sequel to *Traditional Buildings of Britain* traces the

origins and development of traditional buildings by going inside the houses and revealing from their plans how they evolved from basic accommodation to homes giving comfort and privacy. The book shows how local traditional materials--earth, timber, stone, brick--were used in the construction of the buildings.
