Non-discrimination and Equality in the View of the UN Human Rights Treaty Bodies Wouter Vandenhoele, 2005 As part of a larger research project on harmonisation and convergence among UN human rights treaty bodies, scrutinises convergence and divergence, communality, and related issues. Focuses on five Committees: The Convention on the Elimination of All Forms of Racial Discrimination (CERD), the Human Rights Committee (HRC), the International Covenant on Economic, Social and Cultural Rights (CESCR), the Convention on the Elimination of All forms of Discrimination Against Women (CEDAW), and the Convention on the Rights of the Child (CRC).

The EU Race Directive Erica Howard, 2009-10-16 In 2000, the European Union adopted a Directive against discrimination on the grounds of racial or ethnic origin. This book provides an in-depth evaluation of the Race Directive and its effects, questioning how successful the Race directive has been. The EU Race Directive discusses the history of the fight against racial discrimination in the EU and the equality clauses in international Human Rights instruments. It then examines the terms race, racism and racial discrimination and equality in the Directive. The book also looks at the concepts of equality which can be distinguished in the Race Directive and in the subsequent developments at EU level. Examining whether the Directive has improved the protection against racial or ethnic origin discrimination for people within the EU, the book concludes with an assessment of how far the EU has come on the road to racial equality with the adoption of the Race Directive and the subsequent developments. It also contains proposals for possible improvements. The comprehensive and up-to-date analysis in this book goes beyond most other books written on the subject and the specific focus on racism and racial discrimination means a more thorough examination than most texts focusing on discrimination on a larger number of grounds. This book will be of great value to students and academics in (European) law, social sciences and human rights, researching racism, racial discrimination, ethnicity and race relations. It will also be useful for policy makers.

The International Convention on the Elimination of All Forms of Racial Discrimination Patrick Thornberry, 2016 This Oxford Commentary is the first comprehensive article-by-article analysis of the provisions of the Convention on the Elimination of All Forms of Racial Discrimination. It discusses the conceptual and instrumental framework of the Convention and the CERD Committee, and addresses some of the critical challenges confronting the Convention.

Sport and Discrimination Daniel Kilvington, John Price, 2017-01-20 Despite campaigns to educate and increase awareness,

discrimination continues to be a deep-rooted problem in sport. This book provides an international, interdisciplinary and critical discussion of various forms of discrimination in sport today, with contributions from world-leading academics and high-profile campaigners. Divided into five sections, the book explores racism, sexism, homophobia, disability, and the role of media in both perpetuating and tackling discrimination across a variety of sports and sporting events around the world. Drawing on examples from football, rugby, cricket, tennis, climbing, the Olympics and the Paralympics, it offers a critical review of current debates and discusses the latest empirical research on the changing nature of discrimination in sport. Taking into account the experiences of athletes and coaches across all performance levels, it presents recommendations for further action and directions for future research. A timely and challenging study, *Sport and Discrimination* is essential reading for all students and scholars of sports studies with an interest in the sociology of sport and the relationship between sport, society and the media.

**Pattern Discrimination** Clemens Apprich, Wendy Hui Kyong Chun, Florian Cramer, Hito Steyerl, 2018-11-13 How do “human” prejudices reemerge in algorithmic cultures allegedly devised to be blind to them? How do “human” prejudices reemerge in algorithmic cultures allegedly devised to be blind to them? To answer this question, this book investigates a fundamental axiom in computer science: pattern discrimination. By imposing identity on input data, in order to filter—that is, to discriminate—signals from noise, patterns become a highly political issue. Algorithmic identity politics reinstate old forms of social segregation, such as class, race, and gender, through defaults and paradigmatic assumptions about the homophilic nature of connection. Instead of providing a more “objective” basis of decision making, machine-learning algorithms deepen bias and further inscribe inequality into media. Yet pattern discrimination is an essential part of human—and nonhuman—cognition. Bringing together media thinkers and artists from the United States and Germany, this volume asks the urgent questions: How can we discriminate without being discriminatory? How can we filter information out of data without reinserting racist, sexist, and classist beliefs? How can we queer homophilic tendencies within digital cultures?

[The Economics of Discrimination](#) Gary S. Becker, 2010-08-15 This second edition of Gary S. Becker's *The Economics of Discrimination* has been expanded to include three further discussions of the problem and an entirely new introduction which considers the contributions made by others in recent years and some of the more important problems remaining. Mr. Becker's work confronts the economic effects of discrimination in the market place because of race, religion, sex, color, social class, personality, or other non-pecuniary considerations. He demonstrates that discrimination in the market place by any group reduces their own real incomes as well as those of the minority. The original edition of *The Economics of Discrimination* was warmly received by economists, sociologists, and psychologists alike for focusing the discerning eye of economic analysis upon a vital social problem—discrimination in the market place. This is an unusual book; not only is it filled with ingenious theorizing but the implications of the theory are boldly confronted with facts. . . . The intimate relation

of the theory and observation has resulted in a book of great vitality on a subject whose interest and importance are obvious.—M.W. Reder, *American Economic Review* The author's solution to the problem of measuring the motive behind actual discrimination is something of a tour de force. . . . Sociologists in the field of race relations will wish to read this book.—Karl Schuessler, *American Sociological Review*

**Discrimination, Copyright and Equality** Paul Harpur, 2018-12-13 While equality laws operate to enable access to information, these laws have limited power over the overriding impact of market forces and copyright laws that focus on restricting access to information. Technology now creates opportunities for everyone in the world, regardless of their abilities or disabilities, to be able to access the written word - yet the print disabled are denied reading equality, and have their access to information limited by laws protecting the mainstream use and consumption of information. The Convention on the Rights of Persons with Disabilities and the World Intellectual Property Organization's Marrakesh Treaty have swept in a new legal paradigm. This book contributes to disability rights scholarship, and builds on ideas of digital equality and rights to access in its analysis of domestic disability anti-discrimination, civil rights, human rights, constitutional rights, copyright and other equality measures that promote and hinder reading equality.

Discrimination Law and Practice Chris Ronalds, Elizabeth Raper, 2012-07-02 This seminal textbook on the practical application of Australian discrimination law is suitable for all involved in this branch of the law - lawyers, business people, human resources and industrial relations staff, advocates and students. *Discrimination Law and Practice* examines important recent cases in key areas of discrimination law and particularly in all aspects of employment and harassment, the provision of goods and services and education.

Sex, Discrimination, and Violence Stephen Kershner, 2009 This book is about how the systematic application of some basic principles of applied ethics yields some surprising and very unpopular results. In particular, Kershner investigate three areas: sex, discrimination, and violence. These controversial conclusions will no doubt spur animated and thoughtful discussion amongst readers.

**Legal Control of Racial Discrimination** Laurence Lustgarten, 1980-11-27

*The Concept of Discrimination in International Law* E.W. Vierdag, 1973-07-31 This book was written as a dissertation for the Doctorate of Laws, University of Amsterdam. I am most grateful, first of all, to Professor A. J. P. Tammes, who acted as Promotor. Throughout my working at this study he managed to afford at the same time guidance, inspiration, and complete freedom. I have also benefited much from the suggestions and advice of Dr. Th. e. van Boven of the Dutch Ministry of Foreign Affairs, Member of the U.N. Commission on Human Rights, who was a very helpful Co referent. In earlier stages of the work, the critical remarks by Mr. S. A. Kuipers, Dr. H. Meijers and Miss J. M. van Wouw were of great importance to me. So was the experience of participating in the program of graduate studies of the Columbia University School of Law, in 1968- 1969.

lowe gratitude to the Amsterdam Law Faculty for having offered this opportunity to me. I am indebted to Miss Sinja Alma for her transforming a chaotic manuscript into a neat typescript in a most capable and patient manner; to Miss E. D. J. Jongens for her assistance in sorting out the United Nations documentation; and to Howard S. Gold (Gersono vitch), who was so kind as to correct the faults in my English. Since I went on tinkering with the text I am to blame for all linguistic errors in it. The research for this study was concluded in October, 1972.

Born Free and Equal? Kasper Lippert-Rasmussen, 2013-11-06 What is discrimination? There are certain instances of differential treatment that almost anyone would describe as discriminatory; yet upon deeper examination, this near-unanimity gives way to disagreement and difference. For instance, is it discrimination when hospitals hire non-smokers only? Not only do people differ on which cases of differential treatment they see as discriminatory, they also disagree about when discrimination is morally wrong; what makes it morally wrong; and, indeed, about whether all forms of discrimination are morally wrong! Finally, many disagree over what should be done about wrongful discrimination-especially about what the state could permissibly do to eliminate wrongful discrimination, e.g. in people's love lives. This book addresses these issues. It argues that there are different concepts of discrimination and that different purposes pertaining to different contexts determine which one is the most useful. It gives special attention to a concept of discrimination that ties discrimination to differential treatment of people on the basis of their membership in socially salient groups. Second, it argues that when discrimination is wrong, it is so first and foremost because of its harmful effects. Third, it takes issue with some of the standard devices used to counteract discrimination and submits that combating discrimination requires more than state actions. Finally, it argues that states may sometimes permissibly discriminate.

**Gower Handbook of Discrimination at Work** Hazel Conley, 2016-04-29 Workplace discrimination is an experience that, despite four decades of equality legislation, continues to blight the lives of thousands every year. Discrimination persists on the protected grounds of sex, race, disability, age, sexual orientation, religion or belief and gender reassignment, as well as where no legal protection exists such as in relation to class background or migration status. The Handbook discusses recent changes in equality legislation as well as considering the limitations of legal frameworks in addressing inequality. However, complying with the law is only the first step towards addressing discrimination in the workplace, and the book goes beyond the law and provides evidence of good practice in promoting organisational culture change, as well as considering future directions for policy on equality action. The Gower Handbook of Discrimination at Work looks at both social justice and business case perspectives, and its message is not a negative one. The contributors have considerable depth of understanding of workplace discrimination, both as academics and equality practitioners, their work has contributed to policy formation and all are committed to improving the lives of people at work. They offer insights into existing international developments and make suggestions for the ways in which positive change can be realised. Practitioners, such as human

resources professionals and other managers involved in addressing equality at work, trade unionists, equality trainers, and academics concerned with researching or teaching in the areas of employment and equality will all find this book of interest. Furthermore, it will be of value to students in the fields of business and management, employment law, equality and diversity and human resource management.

**The Routledge Handbook of the Ethics of Discrimination** Kasper Lippert-Rasmussen, 2017-08-23 While it has many connections to other topics in normative and applied ethics, discrimination is a central subject in philosophy in its own right. It plays a significant role in relation to many real-life complaints about unjust treatment or unjust inequalities, and it raises a number of questions in political and moral philosophy, and in legal theory. Some of these questions include: what distinguishes the concept of discrimination from the concept of differential treatment? What distinguishes direct from indirect discrimination? Is discrimination always morally wrong? What makes discrimination wrong? How should we eliminate the effects of discrimination? By covering a wide range of topics, and by doing so in a way that does not assume prior acquaintance, this handbook enables the reader to get to grips with the omnipresent issue. The Routledge Handbook of the Ethics of Discrimination is an outstanding reference source to this exciting subject and the first collection of its kind. Comprising over thirty chapters by a team of international contributors the handbook is divided into six main parts: • conceptual issues • the wrongness of discrimination • groups of ‘discriminatees’ • sites of discrimination • causes and means • history of discrimination. Essential reading for students and researchers in applied ethics and political philosophy the handbook will also be very useful for those in related fields, such as law, sociology and politics.

For Discrimination Randall Kennedy, 2013-09-03 The definitive reckoning with Affirmative Action, one of America’s most explosively contentious and divisive issues—from “one of our most important and perceptive writers on race and the law.”—The Washington Post “A clear-eyed take on America’s battle over affirmative action and diversity.... [Kennedy] goes straight at the issue with fearlessness and a certain cheekiness.” —Los Angeles Times “Compelling.... Powerful.” —Wall Street Journal What precisely is affirmative action, and why is it fiercely championed by some and just as fiercely denounced by others? Does it signify a boon or a stigma? Or is it simply reverse discrimination? What are its benefits and costs to American society? What are the exact indicia determining who should or should not be accorded affirmative action? When should affirmative action end, if it must? Randall Kennedy gives us a concise and deeply personal overview of the policy, refusing to shy away from the myriad complexities of an issue that continues to bedevil American race relations.

Age Discrimination by Employers Kerry Segrave, 2001-05-16 In 1907, the editor of The New York Times wrote, Employers, naturally, look to the young. A man or woman of advanced years is too apt to be given to old-fashioned ways of doing things, and open to suspicion of having the unforgivable fault, in modern business, of slowness. Age discrimination has existed throughout the 20th century, sometimes in the public eye and sometimes not. This book examines the problem as it

relates to the employment sector in the United States throughout the century: how the issue has been treated by the media, what is the extent of age bias, how older workers were viewed, the reasons and rationales presented by business enterprises for their refusal to hire older workers, and the responses of governments to the problem. Some foreign data are used for comparison purposes; age bias exists in all industrial societies, regardless of the type of government a country provides for itself.

*Beyond Systemic Discrimination* Päivi Gynther, 2007-11-30 This coherent and pragmatically relevant monograph examines the soundness of the legal framework in education. Deriving from the disadvantage doctrine, it presents an analytical scheme for diagnosing whether or not domestic education law is in harmony with international human rights and minority rights law. The book examines law as a system and focuses on the reported perpetuation of educational disadvantage among Roma all over Europe. This focus suggests that minority individuals falling into several partly overlapping categories may become subjected to educational discrimination even by states that appear to fulfil relevant international standards. A functional approach to skills acquisition is suggested as a constructive way forward towards sustainable and inclusive education systems.

**Confronting Prejudice and Discrimination** Robyn K. Mallett, Margo J. Monteith, 2019-03-09 *Confronting Prejudice and Discrimination: The Science of Changing Minds and Behaviors* focuses on confrontation as a strategy for reducing bias and discrimination. The volume tackles questions that people face when they wish to confront bias: What factors influence people's decisions to confront or ignore bias in its various forms? What are the motives and consequences of confrontation? How can confrontation be approached individually, through education and empowerment, and in specific contexts (e.g., health care) to yield favourable outcomes? These questions are paramount in contemporary society, where confrontation of bias is increasingly evident. Moreover, great strides in the scientific study of confrontation in the past 20 years has yielded valuable insights and answers. This volume is an essential resource for students and researchers with an interest in prejudice and prejudice reduction, and will also be valuable to non-academics who wish to stand up to bias through confrontation. Addresses factors that determine individuals' decisions to confront stereotyping, prejudice and discrimination Analyzes how personal and collective motives shape responses in confrontation-relevant situations Examines the consequences of confrontation from the perspectives of targets, perpetrators and bystanders Provides a roadmap for how to prepare for and engage in successful confrontations at the individual level Covers confronting bias in various settings including in schools, health care, the workplace and on the internet Discusses confrontation in the context of racism, sexism, sexual harassment and other forms of bias, including intersectional forms of bias

**Discrimination and Classification** David J. Hand, 1981-11-04 Distribution-free methods; Parameterized distributions; Linear discriminant functions; Discrete variables; Variable selection; Cluster analysis; Miscellaneous topics.

Discrimination Law Nicholas Bamforth, Maleiha Malik, Colm O'Cinneide, 2008 This text gives an exposition of domestic, European and international anti-discrimination law. It draws on historical, anthropological, economic and political science scholarship, and places the law in a broad theoretical context.
