Blaze Your Own Trail Rebekah Bastian, 2020-02-11 So many women enter their adult lives believing that they should know where they are going and how to get there. This can make life decisions feel intimidating and overwhelming. While some choices that lie ahead are fairly predictable, such as those surrounding career, partnership, and motherhood, the effects of these choices can lead to more complicated and unexpected turns that are seldom discussed. Rather than suggesting a rule book, Rebekah Bastian, vice president at Zillow and recognized thought leader, inspires you to Blaze Your Own Trail. "I have the benefit of being a living example of crooked paths, magnificent screw-ups, and shocking successes," she writes. Through storylines and supportive data that explore workplace sexism, career changes, marriage, child-rearing, existential crises, and everything in between, you will learn to embrace and feel less alone in your own nonlinear journey. Even better, you can turn back decisions and make different ones. Blaze Your Own Trail includes nineteen possible outcomes and many routes to get there. You will find that you have the strength to make it through any of them.

Reproductive Justice and the Catholic Church Emily Reimer-Barry, 2024-06-10 Pregnancy loss is profoundly complex, ambiguous, and alienating, but telling women who have procured abortions that they are murderers and sinners is not the best way forward. Magisterial teachings on abortion are too often presented as moral absolutes, when in fact moral absolutism distorts the rich wisdom of the Catholic intellectual tradition. This book initiates a new conversation about women's experiences of miscarriage, stillbirth, and abortion, arguing that we need not approach these difficult life experiences in a simplistic way. Dr. Reimer-Barry argues that both the pro-life and pro-choice movements make important and valuable claims, yet each approach on its own is flawed. Drawing on the framework of reproductive justice together with Catholic social teaching, Dr. Reimer-Barry suggests a new way forward for abortion discourse that takes seriously the full human dignity of women and the intrinsic (though not absolute) value of prenatal life. She argues that instead of thinking of the Church as a moral teacher—with leaders in Rome or Washington, DC dictating to the consciences of the faithful—a better way to address the complexity of difficult pregnancy discernments would be to think of the Church as a community of support in the midst of and after difficult discernments; a community that seeks justice together and implements structural reforms while also providing spiritual care to those in need. What women deserve, is justice.

The PallasCeres Report Megan K. Seibert, 2023-09-21 The Green New Deal has become the global emblem for combatting climate change and averting planetary disaster. But it couldn't be more wrong in its characterization of the problem and prescription for what to do about it. Masquerading as the pinnacle of liberal progress, it would lead us down a path just as destructive as the one we're already on. This comprehensive report—at once analytical, philosophical, political, and an accessible, heartfelt call to action—maps an alternative to the scores of energy transition plans drunk on illusory 'tweakerism' and political correctness. Grounded in sober ecology and metaphysics, it outlines what would actually be required to wean society off fossil fuels, avert catastrophic collapse, and claim a sustainable path worthy of dignified human beings. Containing an extensive yet concise exploration of the problématique (why the Green New Deal is flawed and what a genuine one would look like) followed by detailed policy recommendations and fiscal proposals, this is both a roadmap for governments and a valuable resource for anyone interested in energy and building the New World. Unlike other commentary on this topic, The PallasCeres Report is not a Marxist critique, whereby socialist techno-industrial society is presumed to be more sustainable than capitalist techno-industrial society. It does not outline the litany of problems with "renewables" only to conclude that they're still better than fossil fuels. It is not a vague call for 'degrowth' accompanied by a 'circular economy.' Nor does it champion empty rhetoric about 'free energy' that would simply continue to power our destructive system. It is a giant leap outside the box, detailing why soulless modern civilization is unsustainable and how an entirely new way of being can be born at this pivotal time.

Ready Elizabeth Gregory, 2012-08-07 Over the past three decades, skyrocketing numbers of women have chosen to start their families in their late thirties and early forties. In 2005, ten times as many women had their first child between the ages of 35 and 39 as in 1975, and thirteen times as many had their first between 40 and 44. Women now have the option to define for themselves when they're ready for family, rather than sticking to a schedule set by social convention. As a society, however, we have yet to come to terms with the phenomenon of later motherhood, and women who decide it makes sense for them to delay pregnancy often find themselves confronted with alarmist warnings about the dangers of waiting too long. In Ready, Elizabeth Gregory tracks the burgeoning trend of new later motherhood and demonstrates that for many women today, waiting for family works best. She provides compelling evidence of the benefits of having children later -- by birth or

by adoption. Gregory reveals that large numbers of women succeed in having children between 35 and 44 by the usual means (one in seven kids born today has a mom in that age range), and that many of those who don't succeed nonetheless find alternate routes to happy families via egg donation or adoption. And they're glad they waited. Without ignoring the complexities that older women may face in their quest to have children, Gregory reveals the many advantages of waiting: Stronger family focus: Having achieved many of their personal and career goals, new later moms feel ready to focus on family rather than trying to juggle priorities More financial power: New later moms have established careers and make higher salaries Greater self-confidence: New later moms have more career experience, and their management skills translate directly into managing a household and advocating for their children More stable single-parenting: New later moms who are single have more resources High marriage rate: On average, 85 percent of new later moms are married, lending stability to the family structure Longer lives: Evidence indicates that new later moms actually live longer than moms who start their families earlier Based on in-depth interviews with more than 100 new later moms and extensive collateral research, *Ready* shatters the myths surrounding later motherhood. Drawing on both the statistical evidence and the voices of the new later mothers themselves, Gregory delivers surprising and welcome news that will revolutionize the way we think about motherhood.

The Whole Life Fertility Plan Kyra Phillips,Jamie Grifo PhD,2015-02-01 A proactive and comprehensive guide to help you understand and preserve your fertility options. Does stress affect your fertility? Should you be worried about chemicals in your lipstick? Should you avoid materials made with plastic? How does diet affect your chance of conception? Should you

be eating only organic food? Does acupuncture increase your chances? How old is too old? In *THE WHOLE LIFE FERTILITY PLAN*, Kyra Phillips and Dr. Jamie Grifo answer all your pressing questions about fertility health—and address things you didn't even know to ask—whether you're planning to wait to have kids or are starting the process now. Phillips spent her 20s and 30s building her career, and wasn't ready to start a family until she turned 40. She met with Dr. Grifo, the director at the renowned NYU Fertility Health Center, and after an uphill (but ultimately successful) battle on the road to conception, she learned that there were a number of things—simple things—she could have been doing differently over the years. For too long, women have believed that when it comes to their fertility, their bodies will cooperate when the time is right. But fertility is not unlike heart health; it's important to be proactive. As women are becoming increasingly aware of their fertility health and waiting longer to have children, they are starting to take control of their fertility long before they are ready to start trying. Whether you're in your 20s, 30s or 40s, and want to start a family now or down the line, don't leave it up to chance—educate yourself about what affects your fertility.
