**Trevor Bryce, Jessie Birkett-Rees**

*Atlas of the Prehistoric World* Douglas Palmer, 2004

Atlas of the Prehistoric World Douglas Palmer, 1999 From its beginnings as an accumulation of molten space debris over 4.6 billion years ago, the Earth has undergone astounding transformations, both geological and biological, to arrive at its familiar look today. The Discovery Channel's Atlas of the Prehistoric World is a dynamic portrait of the Earth and the interplay among the various forces that shaped both the planet and the life upon it. Atlas of the Prehistoric World is divided into three major sections, each of which offers a distinctive look at our planet's pre-history. In The Changing Globe computer-generated global maps track the Earth's shift in topography during eighteen different geological periods.... From the rise of mountain ranges to the creation of new oceans, the world takes on its different faces through the course of eons. Life on Earth chronicles the evolution of plant and animal life, from the first single-celled microbes to land-dwelling mammals. Each of the Earth's major geological eras is profiled in its own chapter, which depicts the life forms that developed as continents drifted, volcanoes erupted, and meteorites crashed to the surface. Specially commissioned panoramic illustrations take snapshots of life at a particular time and place.... These... reflect the latest scientific thinking about how creatures from each period would have appeared, bringing to life animals and plantlife we can otherwise see only as fossils. Earth Fact File, an indispensable gazetteer, explains important Earth science concepts and provides a useful tool for understanding prehistory. Accompanied by over 250 full-color photographs and illustrations and 68 maps, the Discovery Channel's Atlas of the Prehistoric World is a unique must-have resource for any family member.

**Atlas of the Prehistoric World** Douglas Palmer, 2000 This work takes the reader on a journey back into time to see the Earth as it was. Chapter openers reveal the clues that have enabled scientists to uncover the Earth's secret history, reconstructions show the important flora and fauna of each period, and feature spreads explore events of interest.

scientific research, this atlas brings to life the world of dinosaurs and other prehistoric creatures. Journey back in time and find out where dinosaurs roamed. This unique children's atlas explores each continent, revealing fossil sites and stories on every map. Dinosaur Atlas is packed with maps of early Earth and more than 40 profiles of dinosaurs and other prehistoric animals. Stare down a T-Rex in North America. Watch out for Velociraptors' slashing claws in the Gobi Desert. Trek across the Siberian tundra and discover a woolly mammoth. **Atlas of the Ancient Near East** Trevor Bryce, Jessie Birkett-Rees, 2016-04-20 This atlas provides students and scholars with a broad range of information on the development of the Ancient Near East from prehistoric times through the beginning of written records in the Near East (c. 3000 BC) to the late Roman Empire and the rise of Islam. The geographical coverage of the Atlas extends from the Aegean coast of Anatolia in the west through Iran and Afghanistan to the east, and from the Black and Caspian Seas in the north to Arabia and the Persian Gulf and Indian Ocean in the south. The Atlas of the Ancient Near East includes a wide-ranging overview of the civilizations and kingdoms discussed, written in a lively and engaging style, which considers not only political and military issues but also introduces the reader to social and cultural topics such as trade, religion, how people were educated and entertained, and much more. With a comprehensive series of detailed maps, supported by the authors' commentary and illustrations of major sites and key artifacts, this title is an invaluable resource for students who wish to understand the fascinating cultures of the Ancient Near East.

**Atlas of a Lost World** Craig Childs, 2018-05-01 From the author of *Apocalyptic Planet* comes a vivid travelogue through prehistory, that traces the arrival of the first people in North America at least twenty thousand years ago and the artifacts that tell of their lives and fates. In *Atlas of a Lost World*, Craig Childs upends our notions of where these people came from and who they were. How they got here, persevered, and ultimately thrived is a story that resonates from the Pleistocene to our modern era. The lower sea levels of the Ice Age exposed a vast land bridge between Asia and North America, but the land bridge was not the only way across. Different people arrived from different directions, and not all at the same time. The first explorers of the New World were few, their encampments fleeting. The continent they reached had no people but was inhabited by megafauna—mastodons, giant bears, mammoths, saber-toothed cats, five-hundred-pound panthers, enormous

bison, and sloths that stood one story tall. The first people were hunters—Paleolithic spear points are still encrusted with the proteins of their prey—but they were wildly outnumbered and many would themselves have been prey to the much larger animals. *Atlas of a Lost World* chronicles the last millennia of the Ice Age, the violent oscillations and retreat of glaciers, the clues and traces that document the first encounters of early humans, and the animals whose presence governed the humans' chances for survival. A blend of science and personal narrative reveals how much has changed since the time of mammoth hunters, and how little. Across unexplored landscapes yet to be peopled, readers will see the Ice Age, and their own age, in a whole new light.
