Native Arts Of North America, Africa, And The South Pacific George A. Corbin,2018

Native Arts Of North America, Africa, And The South Pacific George A. Corbin,2018-05-04 This introduction to the art of tribal peoples of North America, Africa, and the South Pacific does not briefly cover the hundreds of artistic traditions in these three vast areas but rather studies in depth thirty-six art styles within all three areas using the methods of art history, including stylistic analysis and iconographic interpretation. Emphasis is on the art in cultural context and as a system of visual communication within each tribal area. Where appropriate for a more complete understanding of the art, data from archaeology, ethnology, linguistics, religion, and other humanistic disciplines are included. Among the peoples and cultures whose art is studied are the Haida, Kwakiutl, and Tlingit; the Hohokam and Mongollon, the Anasazi and Hopi; the Dogon and Bamana of Mali; the Asante of Ghana; the Benin, Yoruba, and Ibo of Nigeria; the Fan, the Bamum, and the Kuba of Central Africa; Australian aboriginal and Island New Guinea art; Island Melanesia art; central and eastern Polynesia; Hawaii and the Maori in Marginal Polynesia. The format of the text and selected illustrations is based on seventeen years of teaching African, North American Indian, and South Pacific art to undergraduate and graduate students at Herbert H. Lehman College (CUNY), New York University, and Columbia University. The book is intended for art history and anthropology students and the interested lay reader or collector. The detailed notes at the end of the book are for further study, research, and understanding of the tribal art style under discussion.

Pacific Art Anita Herle,2002-01-01 Contributors explore the complex relations among Pacific artists, patrons, collectors, and museums over time, as well as the different meanings given to art objects by each.

American Anthropology in Micronesia Robert C. Kiste,Mac Marshall,1999-01-01 American Anthropology in Micronesia: An Assessment evaluates how anthropological research in the Trust Territory has affected the Micronesian people, the U.S. colonial administration, and the discipline of anthropology itself. Contributors analyze the interplay between anthropology

and history, in particular how American colonialism affected anthropologists' use of history, and examine the research that has been conducted by American anthropologists in specific topical areas of socio-cultural anthropology. Although concentrating largely on disciplinary concerns, the authors consider the connections between work done in the era of applied anthropology and that completed later when anthropology was pursued mainly for its own sake. The focus then returns to applied concerns in more recent years and issues pertaining to the relevance of anthropology for the world of practical affairs. It will be of essential interest to students and scholars of Pacific Islands studies and the history of anthropology.

Thinking with Things Esther Pasztory, 2005-08-01 At its heart, Pasztory's thesis is simple and yet profound. She asserts that humans create things (some of which modern Western society chooses to call art) in order to work out our ideas - that is, we literally think with things. Pasztory draws on examples from many societies to argue that the art-making impulse is primarily cognitive and only secondarily aesthetic. She demonstrates that art always reflects the specific social context in which it is created, and that as societies become more complex, their art becomes more rarefied.--Jacket.

Masks and Masking Gary Edson, 2015-07-11 For at least 20,000 years, masking has been a mark of cultural evolution and an indication of magical-religious sophistication in society. This book provides a comprehensive understanding of the mask as a powerful cultural phenomenon--a means by which human groupings attempted to communicate their dignity and sense of purpose, as well as establish a continuum between the natural and supernatural worlds. It addresses the distinctive environments within which masks flourished, and analyzes the mask as a manifestation of art, ethnology and anthropology.

Perspectives On Western Art Linnea Wren, 2018-02-22 This anthology of readings related to Western art history explains specific works of art illustrated in Janson's History of Art and De la Croix and Tansey's Gardner's Art Through the Ages in terms of the ideas, beliefs, and concerns of the people and cultures who created the art. It brings a new understanding of art because it shows the social and cultural basis of major works of art through history. The ten sections are Ancient Near East; Egyptian; Aegean; Greek; Etruscan; Roman; early Christian, Byzantine, and Islamic; early Medieval; Romanesque; and Gothic. The readings have been drawn from many areas of intellectual and social history, including religion, philosophy, literature, science, economics, and law. Each selection is preceded by an introductory note, which discusses the readings in terms of its subject and theme, its source and usage, and its relevance to the study of the work of art.

Renaissance And Renascences In Western Art Erwin Panofsky, 2018-05-04 Renaissance and Renascences in Western Art spans the period from the 10th to the 15th century, including discussion of the Carolingian renaissance and the 12th century proto-renaissance. Erwin Panofsky posits that there were reascences prior to the widely known Renaissance that began in

Italy in the 14th century. Whereas earlier renaissances can be classified as revivals, the Renaissance was a unique instance that led to a wider cultural transformation.

Artistic Heritage in a Changing Pacific Philip J. C. Dark, Roger G. Rose, 1993-09-01 “The great value of [this work] is the uniformly high quality of papers and their revelation of contemporary trends in Oceanic art research.” —Ethnoarts
Oceania Metropolitan Museum of Art (New York, N.Y.), Eric Kjellgren, 2007 Includes detailed chapters devoted to each of the five major cultural regions of the Pacific: Australia, Melanesia, Micronesia, Polynesia, and the islands of Southeast Asia.

Art Themes Marjorie Cohee Manifold, 2017-11-20 Flexible in approach and full of colorful examples, this textbook provides a basic introduction to what art is and can be in the lives of people who do not necessarily think of themselves as artists. You will be taught about a variety of art themes, genres, materials, and processes that appeal to novice art makers. The lessons are organized by themes of general subject matter or media. Options are available for work in mixed media, crafts, photography and digital media, as well as in traditional drawing or painting media. After picking a theme of particular interest to you, look next at the four strands of lessons presented in that thematic unit. Moving from left to right, select one lesson from each consecutive strand and complete that lesson. Because each lesson builds upon previously presented knowledge and developed skill, as you progress through four lessons, one from each strand, you should grow in your understanding of art concepts, meanings, and processes, while also improving your art making skills. Completing this course will help you develop a new appreciation for the power and possibilities of art learning, by understanding better the art others create, as well as making it yourself.

Dutch Painting In The Seventeenth Century Madlyn Millner Kahr, 2018-02-23 This new edition of an established survey of the Golden Age of Dutch painting has been revised, corrected, and updated in the text, notes, and bibliography as a result of new scholarship. The author has written a new preface to this edition. Rembrandt, Vermeer, Hals, Ruisdael, Cuyp, de Witte, van Goyen, van de Velde, Hobbema, Fabritius, de Hooch, and Saenrendam are some of the painters included and discussed.

Caravaggio Howard Hibbard, 2018-05-04 Caravaggio was one of the most important Italian painters of the 17th century. He was, in fact, the wellspring of Baroque painting. In Hibbard's words, Caravaggio's paintings speak to us more personally and more poignantly than any others of the time. In this study, Howard Hibbard evaluates the work of Caravaggio: notorious as a painter-assassin, hailed by many as an original interpreter of the scriptures, a man whose exploration of nature has been likened to that of Galileo.

A World History of Art Hugh Honour, John Fleming, 2005 Over two decades this art historical tour de force has consistently proved the classic introduction to humanity's artistic heritage. From our paleolithic past to our digitised present, every continent and culture is covered in an articulate and well-balanced discussion. In this Seventh Edition, the text has been revised to embrace developments in archaeology and art historical research, while the renowned contemporary art

historian Michael Archer has greatly expanded the discussion of the past twenty years, providing a new perspective on the latest developments. The insight, elegance and fluency that the authors bring to their text are complemented by 1458 superb illustrations, half of which are now in colour. These images, together with the numerous maps and architectural plans, have been chosen to represent the most significant chronological, regional and individual styles of artistic expression.

The Art Spirit Robert Henri,2007-08-01 A classic work of advice, criticism, and inspiration for aspiring artists and lovers of art Art when really understood is the province of every human being. So begins *The Art Spirit*, the collected words, teachings, and wisdom of innovative artist and beloved teacher Robert Henri. Henri, who painted in the Realist style and was a founding member of the Ashcan School, was known for his belief in interactive nature of creativity and inspiration, and the enduring power of art. Since its first publication in 1923, *The Art Spirit*, has been a source of inspiration for artists and creatives from David Lynch to George Bellows. Filled with valuable technical advice as well as wisdom about the place of art and the artist in American society, this classic work continues to be a must-read for anyone interested in the power of creation and the beauty of art.

American Artists On Art Ellen Johnson,2018-02-20 From the Preface: The fact that so much of modern art has devoted itself to the exploration and assertion of its own identity is reflected in, but does not explain, the increasing amount of writing and talking on the part of contemporary artists. Rather, the whole history of the changing role of art and artists in a democratic, industrial, and technological society stands behind the spate of artists' words and the public's hunger for them--even some of the general public out there beyond art's little circle. Statements by artists appeal somewhat the way drawings do: they bring us, or at least they hold the promise of bringing us, closer to the artist's thoughts and feelings and to an understanding of his or her modus operandi; they hold the keys to a mysterious realm. And sometimes they offer us the sheer pleasure of good reading. Such is the primary *raison d'etre* of this book. Its other motivation is educational, and stems from the frustrating lack, in teaching contemporary art, of any single compilation of statements by American artists from 1940 to the present.... This anthology differs in several respects from those others that do include documents of American art since 1940.... The selection I have made is devoted exclusively to statements of artists; it is limited to the last four decades; it presents in a single volume a representative and fairly comprehensive coverage of major developments in American art beginning with Abstract Expressionism; and, whenever possible, it cites the first, or among the very earliest, documents signaling a shift in the definition, intent, or direction of art.

America Builds Leland M. Roth,2019-03-01 Architecture requires a broad definition. It involves more than simply questions of style, esoteric theory, or technical progress; it is the physical record of a culture's relationship to its technology

and the land, and, most important, of the system of values concerning men's relationships with one another. Hence this volume, like my Concise Hist
