Introduction to Nursing Informatics Kathryn J. Hannah, Marion J. Ball, Margaret J.A. Edwards, 2013-04-17 This series is intended for the rapidly increasing number of health care professionals who have rudimentary knowledge and experience in health care computing and are seeking opportunities to expand their horizons. It does not attempt to compete with the primers already on the market. Eminent international experts will edit, author, or contribute to each volume in order to provide comprehensive and current accounts of innovations and future trends in this quickly evolving field. Each book will be practical, easy to use, and well referenced. Our aim is for the series to encompass all of the health professions by focusing on specific professions, such as nursing, in individual volumes. However, integrated computing systems are only one tool for improving communication among members of the health care team. Therefore, it is our hope that the series will stimulate professionals to explore additional means of fostering interdisciplinary exchange. This series springs from a professional collaboration that has grown over the years into a highly valued personal friendship. Our joint values put people first. If the Computers in Health Care series lets us share those values by helping health care professionals to communicate their ideas for the benefit of patients, then our efforts will have succeeded.

Book Only Dee McGonigle, Kathleen Mastrian, 2012 This book is the ideal student guide to the history of healthcare informatics, current issues, basic informatics concepts, and health information management applications.

Nursing Informatics American Nurses Association, 2015 The second edition of *Nursing Informatics: Scope and Standards of Practice* is the most comprehensive, up-to-date resource available in this subject area. The book covers the full scope of nursing informatics and outlines the competency level of nursing practice and professional performance expected from all informatics nurses and nurse specialists. In addition, it details the nursing informatics competencies needed by any RN, spans all nursing careers and roles, and reflects the impact of informatics in any health care practice environment. This is a must-read for nurses, as informatics touche.

Nursing Informatics Marion J. Ball, Kathryn J. Hannah, Ulla Gerdin Jelger, Hans Peterson, 2013-11-11 Nursing, like other health-related professions, is information-intensive. The quality of care a patient receives is based on the soundness of judgment exercised by the health care team. Underlying sound judgment is up-to-date information. Unless nurses have access to accurate and pertinent information, the care being rendered will not be of the highest standard. What is required is not necessarily more rapid and efficient information services. Modern technology can process immense amounts of data in the blink of an eye. What we in the health professions need are information systems that are more intelligent, systems that can integrate information from many sources, systems that analyze and synthesize information and display it so that it may be applied directly in patient care—in other words, information that answers a question or even gives practical advice. In order to accomplish such objectives, work is needed to establish the scientific and theoretical basis for the use of computing and information systems by health professionals. This is the research component. In addition, there is the need for continued development and evaluation of practical information systems.

Nursing and Informatics for the 21st Century Charlotte Weaver, Connie Delaney, Patrick Weber, Robyn Carr, 2010-02-22 *Nursing and Informatics for the 21st Century* is the follow-up to the highly successful, award-winning first edition. This updated edition, co-published

Forecasting Informatics Competencies for Nurses in the Future of Connected Health J. Murphy, W. Goossen, P. Weber, 2017-01-26 Nursing informatics has a long history of focusing on information management and nurses have a long history of describing their computer use. However, based on the technical advances and through the ongoing and consistent changes in healthcare today, we are now challenged to look to the future and help determine what nurses and patients/consumers will need going forward. This book presents the proceedings of the Post Conference to the 13th International Conference on Nursing Informatics, held in Geneva, Switzerland, in June 2016. The theme of the Post Conference is *Forecasting Informatics Competencies for Nurses in the Future of Connected Health*. This book includes 25 chapters written as part of the Post Conference; a result of the collaboration among nursing informatics experts from research, education and practice settings, from 18 countries, and from varying levels of expertise – those beginning to forge

new frontiers in connected health and those who helped form the discipline. The book content will help forecast and define the informatics competencies for nurses in practice, and as such, it will also help outline the requirements for informatics training in nursing programs around the world. The content will aid in shaping the nursing practice that will exist in our future of connected health, when practice and technology will be inextricably intertwined.
