Preventing Occupational Disease and Injury Barry S. Levy, 2005

Personhood and Health Care David C. Thomasma, David N. Weisstub, Christian Hervé, 2014-03-14 PERSONHOOD AND HEALTH CARE This book arose as a result of a pre-conference devoted to the topic held June 28, 1999 in Paris, France. The pre-conference preceded the Annual Congress of the International Academy of Law and Mental Health. Other chapters were solicited after the conference in order to more completely explore the relation of personhood to health care. The pre conference was held in honor of Yves Pelicier who led so many of our French colleagues in medicine, philosophy, and ethics as Christian Herve notes in his Tribute. As health care is aimed at healing persons, it is important to realize how difficult it is to construct a theory of personhood for health care, and thus, a theory of how healing in health care comes about or ought to occur. The book is divided into four parts, Concepts of the Person, Theories of Personhood in Relation to Health Care and Bioethics, Person and Identity, and Personhood and Hs Relations. Each section explores a critical arena in constructing the relation of personhood to health care. Although no exploration of this nature can be exhaustive, every effort was made to

present both conflicting and complementary views of personhood from within similar and different philosophical and religious traditions. PART ONE: CONCEPTS OF THE PERSON Tracing the origins of the concept of person from antiquity through present day, Jean Delemeau provides an historical sketch of the development of a wide range of meanings.

Women in Non-traditional Occupations B. Bagilhole,2002-11-19 This book examines common issues and concepts concerning women in non-traditional, male dominated occupations. It explores the question of whether these women are the agents of change or are instead changed themselves. It provides a statistical examination and theoretical analysis of occupational sex segregation in the UK, the rest of the European Union, and the USA. Then, it provides a more in-depth understanding of women's work lives through the experiences of the women themselves in four occupations; management, academia, engineering and the priesthood.

The Asian Tsunami S. K. Jayasuriya, Peter McCawley,2010-01-01 The 2004 Asian tsunami was the greatest natural disaster in recent times. Almost 230,000 people died. In response, governments in Asia and the broader international community announced large aid programs. The resulting assistance effort was one of the largest humanitarian programs ever organised in the developing world. This book discusses the lessons of the aid effort for disaster protection policy in developing countries.
