The Outlaw Ocean Ian Urbina, 2019-09-19 'Just incredible' Naomi Klein 'Gripping and shocking...with the pace of a thriller' The Times A New York Times bestseller, The Outlaw Ocean is a riveting, adrenalin-fuelled tour of a vast, lawless and rampantly criminal world that few have ever seen: the high seas. The oceans are some of the last untamed frontiers on our planet. Too big to police, and under no clear international authority, these treacherous waters play host to the extremes of human behaviour and activity. From traffickers, smugglers and pirates to vigilante conservationists, stowaways and seabound abortion-providers, Ian Urbina introduces us to the inhabitants of this hidden world and their risk-fraught lives. Through their extraordinary stories, he uncovers a globe-spanning network of crime and exploitation that emanates from the fishing, oil and shipping industries - but to which all of us are connected. **LOGLISTED FOR THE BAILLIE GIFFORD PRIZE 2019** 'An astonishing book about a world most of us don't even know exists' Oliver Bullough, author of Moneyland 'An outstanding investigation of a global criminal culture on the high seas' Guardian 'Truly important... A complex portrait of an unseen and disturbing world' New York Times

Alternative Fuels in Ship Power Plants Xinglin Yang, Zongming Yang, Huabing Wen, Viktor Gorbov, Vira Mitienkova, Serhiy Serbin, 2021-03-18 This book describes the feasibility and status of the use of alternative fuels in marine engineering, as well as the application of liquefied natural gas, biodiesel and their blends as marine fuels, and the combustion of synthetic coal-based fuels. Each chapter in the book ends with a summary, which gives the reader a quick and clear understanding of the main contents of the chapter. The book gives a lot of advice on the selection of equipment and parameters, fuel reserves and preparation for scholars related to alternative fuels in ships, and points them in the way. It contains lots of illustrations and tables and explains it in the form of chart comparison. The authors have developed mathematical models and methods for calculating the parameters of fuel systems for biodiesel fuels and liquefied natural gas. Recommendations for choosing the rational parameters of these systems are given, as are schematic solutions of the fuel systems, recommendations for selecting equipment, storing, and preparing the fuels. Application of the materials described in the book provides the SPP designers with a reliable tool for choosing rational characteristics of the fuel systems operating on alternative fuels and improving the efficiency of their application on ships.

A Japanese Advertising Agency Brian Moeran, 2013-09-13 This is the only book of its kind - written by an

anthropologist who spent twelve months doing fieldwork in a major Tokyo agency and who has spent the past 30 years studying and living in Japan. By examining the production of advertising, this book turns other semiotics, media and cultural studies theories on their heads. By analysing the social structure of a modern media organization from the inside, it makes anthropology relevant and intellectually stimulating. By treating the Japanese as a more-or-less normal and rational people, it explodes the usual myths of exotic Japan and steps boldly into a global arena that embraces 'east' and 'west' in a new theory of values.

Shipboard Acoustics J. Buiten, 2012-12-06 The first International Symposium on Shipboard Acoustics, held in Noordwijkerhout (The Netherlands) in 1976, was a meeting of invited experts, each having considerable expertise in ship acoustics. Many of the participants were dealing with research on various ship acoustical subjects, and it proved to be a good idea to discuss future investigations and new techniques. At that time acousticians learned to use real-time signal-processing techniques and attempts were made to establish sound level prediction methods based on semi-fundamental considerations instead of the methods using empirically obtained data. Time was pressing as it was assumed that, in view of the adoption of Recommendation 141 of the International Labour Conference in 1970, authorities would soon make appropriate provisions to protect seafarers from the ill effects of noise. This resulted in several national recommendations followed by the IMO Code on noise levels aboard ships which was adopted by the IMO Assembly in 1981. After that, pressure on the authorities was increased further by the decision of the European Community to protect labourers against harmful noise at their workplaces, including ships. Legally enforceable noise limits will therefore become normal in the future. In many countries recommendations with respect to maximum allowable sound pressure levels in the crew accommodations and work area aboard ships were already taken into account by ship owners, long before the existence of the Recommendations.

Cruise Ships Peter C. Smith, 2014-03-31 Peter C. Smith presents us here with the second release in his visually splendid *Cruise Ships* series. Whilst his first book concerned itself with the large-scale ships currently cruising through our seas (those weighing 40,000 GT and more) this volume focusses on the other end of the market; the ships that weigh in at less than 40,000 GT, but which are often much more stylish and aesthetically pleasing than their larger-scale counterparts. The elegant interiors and luxurious features on display in today's vast fleet of cruise liners remain unrecorded in all but holiday brochures. This book carries on in the tradition of Peter's last release, giving a complete overview of the best of these ships, the cream of the crop, so to speak. Each colour profile includes external and interior views of the featured ship. Details of the design, building and service history of each vessel are provided with vital statistics of the ship and its facilities. This is a book of reference for maritime enthusiasts, would-be holiday cruisers and those who have been passengers. It serves as an impressive visual tribute to the best of the smaller scale fleet currently cruising globally. As seen in the Bedford Times & Citizen.

On board Space Rescue One are two dedicated teams willing to put their lives on the line to save the lives of others. However, Rescue Team One has a problem in the person of Richard Saber, whose anti-social behavior and drinking threatens to disrupt the team and possibly put their lives needlessly at risk. Treating Richard as another victim crying to be saved, his team buddies pull together to break through his walls of isolation in discovering the reason while the universe around them disintegrates into civil war when the colonies on Mars and Venus declare their independence. There's seems to be no possible way for three ships to rescue so many, but unknown to everyone Richard holds the key to ending the war. Even so, disaster still strikes out at the team in a form that will etch itself into space history! Boson Books also offers The Rust Bucket Universe series by Atk. Butterfly.
